Power Generation in Jordan

SUMMARY

Power Generation in Jordan industry profile provides top-line qualitative and quantitative summary information including: market size (value and volume 2014-18, and forecast to 2023). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

KEY HIGHLIGHTS

The power generation industry volume is defined as the total electrical energy (TWh) generated within a country over the course of each calendar year.

The Jordanian power generation industry had total revenues of \$6.4bn in 2018, representing a compound annual growth rate (CAGR) of 3.5% between 2014 and 2018.

Industry production volume increased with a CAGR of 4.4% between 2014 and 2018, to reach a total of 21.7 TWh in 2018.

Jordan has a number of big energy concerns, not least the fact that there are very few indigenous energy resources to use. 96% of the resources it needs for its domestic power plants come from abroad and have to be imported, the most important of which is oil.
