Power Generation in Poland

SUMMARY

Power Generation in Poland industry profile provides top-line qualitative and quantitative summary information including: market size (value and volume 2014-18, and forecast to 2023). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

KEY HIGHLIGHTS

The power generation industry volume is defined as the total electrical energy (TWh) generated within a country over the course of each calendar year.

The Polish power generation industry had total revenues of \$25.8bn in 2018, representing a compound annual growth rate (CAGR) of 3.9% between 2014 and 2018.

Industry production volume increased with a CAGR of 2.4% between 2014 and 2018, to reach a total of 169.9 TWh in 2018.

Although most countries have a significant degree of government involvement in the power generation industry, in Poland, state-owned companies play exceptionally influential roles, making the government role larger than is normally the case.
