SUMMARY

Power Generation in Russia industry profile provides top-line qualitative and quantitative summary information including: market size (value and volume 2016-20, and forecast to 2025). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

KEY HIGHLIGHTS

The power generation industry volume is defined as the total electrical energy (TWh) generated within a country over the course of each calendar year.

The Russian power generation industry had total revenues of \$68.5bn in 2020, representing a compound annual rate of change (CARC) of -0.9% between 2016 and 2020.

Industry consumption volumes declined with a CARC of -0.7% between 2016 and 2020, to reach a total of 847.2 TWh in 2020.

A stagnant population growth rate means the number of consumers in the Russian industry is not increasing.
