Summary

Power Generation in South Korea industry profile provides top-line qualitative and quantitative summary information including: market size (value 2015-19, and forecast to 2024). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

Key Highlights

The power generation industry volume is defined as the total electrical energy (TWh) generated within a country over the course of each calendar year.

The South Korean Power Generation industry had total revenues of \$57.2bn in 2019, representing a compound annual growth rate (CAGR) of 4.2% between 2015 and 2019.

Industry consumption volume increased with a CAGR of 1% between 2015 and 2019, to reach a total of 567.5 TWh in 2019.

The industry's output declined for the first time after more than two decades amid an economic slowdown which impacted industrial demand, while favorable weather conditions also contributed to softer residential demand.
