Power Generation in Syria

### SUMMARY

Power Generation in Syria industry profile provides top-line qualitative and quantitative summary information including: market size (value and volume 2014-18, and forecast to 2023). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

### KEY HIGHLIGHTS

The power generation industry volume is defined as the total electrical energy (TWh) generated within a country over the course of each calendar year.

The Syrian power generation industry had total revenues of \$0.5bn in 2018, representing a compound annual growth rate (CAGR) of 31.9% between 2014 and 2018.

Industry consumption volumes declined with a compound annual rate of change (CARC) of -3.9% between 2014 and 2018, to reach a total of 18.0 TWh in 2018.

The Syrian economy has struggled in recent years and continued war and extreme numbers of casualties mean that there is little hope for recovery any time soon.
