The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

Key Highlights

The power generation industry volume is defined as the total electrical energy (TWh) generated within a country over the course of each calendar year.

The Chinese Power Generation industry had total revenues of \$777.5bn in 2019, representing a compound annual growth rate (CAGR) of 7.9% between 2015 and 2019.

Industry consumption volume increased with a CAGR of 6% between 2015 and 2019, to reach a total of 7,406.2 TWh in 2019.

The slowdown of the Chinese power generation industry in terms of value growth is mainly driven by lower electricity prices as a result of the energy sector liberalization reforms.
