Real Estate in Netherlands

SUMMARY

Real Estate in the Netherlands industry profile provides top-line qualitative and quantitative summary information including: market size (value and volume 2015-19, and forecast to 2024). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

KEY HIGHLIGHTS

The real estate industry looks at renting and leasing residential properties. The industry is valued using the total revenues generated by landlords via the leasing and renting of private and council properties.

The Dutch real estate industry had total revenues of \$39.4m in 2019, representing a compound annual growth rate (CAGR) of 0.5% between 2015 and 2019.

Industry consumption volumes declined with a CARC of -0.8% between 2015 and 2019, to reach a total of 2.4 billion units in 2019.

Spiraling property prices spreading inflation to rent prices have actually moved the industry forward in recent years. Historically low mortgage rates have stimulated demand for property purchases, with demand for renting being weaker.
