SUMMARY

Renewable Energy in Singapore industry profile provides top-line qualitative and quantitative summary information including: market size (value 2016-20, and forecast to 2025). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

KEY HIGHLIGHTS

The renewable energy market consists of the net generation of electricity through renewable sources. It is divided into four segments, these being hydroelectricity, wind energy, solar, biomass and geothermal. The volume of the market is calculated as the net volume of electricity produced through renewable means and the market value has been calculated according to an average of annual non-household power price, or equivalent, excluding taxes and levies. All market data and forecasts are represented in nominal terms (i.e. without adjustment for inflation) and all currency conversions used in the creation of this report have been calculated using constant 2020 annual average exchange rates.

The Singaporean renewable energy market had total revenues of \$235.9m in 2020, representing a compound annual growth rate (CAGR) of 4.8% between 2016 and 2020.

Market production volume increased with a CAGR of 3.9% between 2016 and 2020, to reach a total of 1,675.7 GWh in 2020.

Biopower had the highest volume in the Singaporean renewable energy market in 2020, with a total of 1,263.8 GWh, equivalent to 75.4% of the market's overall volume.
