SUMMARY

Residential Construction in Asia-Pacific industry profile provides top-line qualitative and quantitative summary information including: market size (value 2016-20, and forecast to 2025). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

KEY HIGHLIGHTS

The residential construction market is defined as the value of work put in place annually for residential buildings. Market value is defined in general as the total output value of construction activity in any given time period, including costs related to construction materials, equipment and services for new construction, refurbishment, repair and maintenance and demolition. All market data and forecasts are represented in nominal terms (i.e. without adjustment for inflation) and all currency conversions used in the creation of this report have been calculated using constant 2020 annual average exchange rates.

The Asia-Pacific residential construction market had total revenues of \$2,235.8bn in 2020, representing a compound annual growth rate (CAGR) of 2.5% between 2016 and 2020.

The new construction segment was the market's most lucrative in 2020, with total revenues of \$1,579.2bn, equivalent to 70.6% of the market's overall value.

New construction of affordable housing units is expected to revive the Asia-Pacific residential construction market and aid recovery over the forecast period.
