KEY HIGHLIGHTS

The residential construction market is defined as the value of work put in place annually for residential buildings. Market value is defined in general as the total output value of construction activity in any given time period, including costs related to construction materials, equipment and services for new construction, refurbishment, repair and maintenance and demolition. All market data and forecasts are represented in nominal terms (i.e. without adjustment for inflation) and all currency conversions used in the creation of this report have been calculated using constant 2020 annual average exchange rates.

The European residential construction market had total revenues of \$1,113.8bn in 2020, representing a compound annual growth rate (CAGR) of 1.6% between 2016 and 2020.

The new construction segment was the market's most lucrative in 2020, with

total revenues of \$618.8bn, equivalent to 55.6% of the market's overall value.

The future of the European residential construction market can be viewed with optimism as generous government COVID-19 recovery packages and the easing of virus control measures are likely to increase consumer confidence and revitalize the market.
