The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

### KEY HIGHLIGHTS

The air freight sector is defined as consisting of revenues generated from freight transportation by air.

The Singaporean air freight sector had total revenues of \$2.4 billion in 2022, representing a negative compound annual growth rate (CAGR) of 12.2% between 2017 and 2022.

Sector consumption volumes declined with a negative CAGR of 15.3% between 2017 and 2022, reaching a total of 3.1 billion FTK in 2022.

The Singaporean air freight sector has declined recently owing to several factors such as increasing interest rates and rising inflation. High-interest rates reduce access to credit for the companies involved, thereby reducing the volume of investment which negatively impacts air freight.
