Singapore Internet Access Market @Summary, Competitive Analysis and Forecast, 2017-2026

SUMMARY

Internet Access in Singapore industry profile provides top-line qualitative and quantitative summary information including: market share, market size (value and volume 2017-21, and forecast to 2026). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

KEY HIGHLIGHTS

The internet access sector consists of the total Internet Service Revenue charged for the provision of narrowband and broadband Internet connections through both consumer and corporate channels. All revenues calculated are retail revenues exclusive of taxes. Only fixed communication is included; mobile connections are not considered.

The Singaporean internet access market had total revenues of \$431.1 million in 2021, representing a compound annual growth rate (CAGR) of 1.1% between 2016 and 2021.

Market volume increased with a CAGR of 1.5% between 2016 and 2021, to reach a total of 4.7 million internet users in 2021.

Fierce price competition among providers, especially through promotions and discounts, has suppressed revenues. While the impact of the pandemic on consumer demand for internet services was limited, it was more evident on business demand, with business interruptions and closures amid the economic downturn resulting in revenue losses for providers.
