Singapore Power Generation Market to 2027

Summary

Power Generation in Singapore industry profile provides top-line qualitative and quantitative summary information including: market size (value 2017-22, and forecast to 2027). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

Key Highlights

The power generation industry volume is defined as the total electrical energy (TWh) generated within a country over the course of each calendar year.

The Singaporean power generation industry had total revenues of \$10 billion in 2022, representing a negative compound annual growth rate (CAGR) of 1.8% between 2017 and 2022.

Industry production volume increased with a CAGR of 1.6% between 2017 and 2022, to reach a total of 54.2 TWh in 2022.

Due to supply disruptions and a jump in fuel costs globally, the wholesale electricity market saw periods of high volatility in the last quarters of 2021 and 2022. The end consequence was a sharp increase in electricity prices, particularly for those customers purchasing at wholesale rates.
