South Africa Foodservice Market Summary, Competitive Analysis and Forecast, 2017-2026

SUMMARY

Foodservice in South Africa industry profile provides top-line qualitative and quantitative summary information including: market share, market size (value 2017-21, and forecast to 2026). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

KEY HIGHLIGHTS

Foodservice is defined as the value of all food and drink, including on-trade drinks not drunk with food, for immediate consumption on the premises or in designated eating areas shared with other foodservice operators, or in the case of takeaway transactions, freshly prepared food for immediate consumption. Foodservice is restricted to the sale of food and drink in specific foodservice channels defined below and excludes vending machines.

The South African foodservice industry had total revenues of \$27.9 billion in 2021, representing a compound annual growth rate (CAGR) of -1.9% between 2016 and 2021.

Industry consumption volumes declined with a CAGR of -1% between 2016 and 2021, to reach a total of 6.4 billion transactions in 2021.

A young population with a growing middle class has presented good growth prospects for operators. However, high unemployment and faltering consumer confidence have dented growth, as has the decline of the South African rand.
