SUMMARY

Construction in Spain industry profile provides top-line qualitative and quantitative summary information including: market size (value 2017-21, and forecast to 2026). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

KEY HIGHLIGHTS

The construction market is defined as the value of work put in place annually for both, residential and non-residential construction.

The Spanish Construction industry had total revenues of \$179.1bn in 2021, representing a compound annual growth rate (CAGR) of 5% between 2016 and 2021.

The Non-Residential Construction segment was the industry's most lucrative in 2021, with total revenues of \$89.6bn, equivalent to 50% of the industry's overall value.

Decline in 2020 of 6% was likely due to economic disruption induced by the COVID-19 pandemic. This significantly hampered economic activity and resulted in the cancellation and delays of many construction projects.
