Steel - Market @Summary, Competitive Analysis and Forecast, 2016-2025 (Global Almanac)

SUMMARY

Global Steel industry profile provides top-line qualitative and quantitative summary information including: market share, market size (value and volume 2016-20, and forecast to 2025). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

KEY HIGHLIGHTS

The steel market consists of the production of crude steel in the stated country or region.

Crude steel production refers to the production of the first solid steel products upon solidification of liquid steel. It includes ingots (in conventional mills) and semis (in modern mills with continuous casting facilities). Crude steel also includes liquid steel, which goes into the production of steel castings.

Market values have been calculated using appropriate regional annual average steel prices.

Market shares reflect volumes of steel produced by a company in a respective market.

All market data and forecasts are represented in nominal terms (i.e., without adjustment for inflation) and all currency conversions used in the creation of this report have been calculated using constant 2020 annual average exchange rates.

Forecast figures presented in this report are calculated using crisis scenarios for the market. The length of the pandemic and restrictions introduced by various countries are still difficult to predict. Many governments had introduced the national lockdowns and temporarily banned sales of products that are deemed 'non-essential'. As the length of the pandemic and its impact on this market is not certain, the data used in this report has been modeled taking forecast impacts on national economics into consideration.

The global steel market had total revenues of \$1,017.9bn in 2020, representing a compound annual growth rate (CAGR) of 8.9% between 2016 and 2020.

Market production volume increased with a CAGR of 3.5% between 2016 and 2020, to reach a total of 1,786.3 million tons in 2020.

The market grew strongly in 2017 and 2018 owing to strong economic growth, particularly in key segments such as construction, machinery, and automotive.

SCOPE

Save time carrying out entry-level research by identifying the size, growth, and leading players in the global steel market

Use the Five Forces analysis to determine the competitive intensity and therefore attractiveness of the global steel market

Leading company profiles reveal details of key steel market players' global operations and financial performance

Add weight to presentations and pitches by understanding the future growth prospects of the global steel market with five year forecasts by both value and volume

REASONS TO BUY

What was the size of the global steel market by value in 2020?

What will be the size of the global steel market in 2025?

What factors are affecting the strength of competition in the global steel market?

How has the market performed over the last five years?

Who are the top competitors in the global steel market?
