### Steel in China

#### Summary

Steel in China industry profile provides top-line qualitative and quantitative summary information including: market share, market size (value and volume 2018-23, and forecast to 2028). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

#### Key Highlights

Steel market consists of the production of crude steel in the stated country or region. Crude steel production refers to the production of the first solid steel products upon solidification of liquid steel. It includes ingots (in conventional mills) and semis (in modern mills with continuous casting facilities). Crude steel also includes liquid steel, which goes into the production of steel castings.

The Chinese steel market recorded revenues of \$859,532.5 million in 2023, representing a compound annual growth rate (CAGR) of 7.7% between 2018 and 2023.

Market production volume increased with a CAGR of 1.9% between 2018 and 2023, reaching a total of 1,019,080.0 thousand tonnes in 2023.

The increase in real Gross Value Added (GVA) in industry annual growth has been a key driver for the steel market. In 2023, the Chinese real GVA in the industrial sector grew by 5.3%, according to the United Nations Statistics Division (UNSTAT). This rise in industrial activity led to higher steel consumption

for machinery, equipment, and construction materials.
