Steel in Europe

Summary

Steel in Europe industry profile provides top-line qualitative and quantitative summary information including: market size (value 2018-23, and forecast to 2028). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

Key Highlights

Steel market consists of the production of crude steel in the stated country or region. Crude steel production refers to the production of the first solid steel products upon solidification of liquid steel. It includes ingots (in conventional mills) and semis (in modern mills with continuous casting facilities). Crude steel also includes liquid steel, which goes into the production of steel castings.

The European steel market recorded revenues of \$212,328.7 million in 2023, representing a compound annual growth rate (CAGR) of 4.9% between 2018 and 2023.

Market production volumes declined with a negative CAGR of 2.4% between 2018 and 2023, reaching a total of 233,961.7 thousand tonnes in 2023.

In 2023, the European steel market, holding 13.3% of the global share, production volume contracted due to rising energy costs and reduced demand from the automotive and construction sectors. Increased production costs, competition from cheaper imports, economic uncertainties, and supply chain

disruptions also contributed to the downturn.
