#### Key Highlights

Steel market consists of the production of crude steel in the stated country or region. Crude steel production refers to the production of the first solid steel products upon solidification of liquid steel. It includes ingots (in conventional mills) and semis (in modern mills with continuous casting facilities). Crude steel also includes liquid steel, which goes into the production of steel castings.

The German steel market recorded revenues of \$31,389.1 million in 2023, representing a compound annual growth rate (CAGR) of 3.1% between 2018 and 2023.

In 2023, the German steel market, holding 14.8% of Europe's share, contracted due to rising energy costs and reduced demand from the automotive and construction sectors. Increased production costs, competition from cheaper imports, economic uncertainties, and supply chain disruptions also contributed
