KEY HIGHLIGHTS

The tablet market consists of the total revenues generated through the sale of tablet computers, such as the Apple iPad or Samsung Galaxy, to end users. The tablet market includes media tablets, but excludes e-readers. All market data and forecasts are represented in nominal terms (i.e. without adjustment for inflation) and all currency conversions used in the creation of this report have been calculated using constant 2020 annual average exchange rates.

The UK tablet sales market had total revenues of \$2.8bn in 2020, representing a compound annual rate of change (CARC) of -1% between 2016 and 2020.

Market consumption volumes declined with a CARC of -0.8% between 2016 and 2020, to reach a total of 12.5 million units in 2020.

The market's poor performance is primarily due to declining demand, combined with the emergence of cheaper tablets, which has led to reduced spending by consumers who have ultimately chosen to purchase more affordable models, if any at all.
