SUMMARY

Telecommunication Services in Portugal industry profile provides top-line qualitative and quantitative summary information including: market size (value 2016-20, and forecast to 2025). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

KEY HIGHLIGHTS

The Telecommunication Services market is defined as the total volume and value of both the Fixed Line Telecommunications market and the Wireless Telecommunications market. The market volume here is defined as number of fixed-line and wireless subscriptions. The fixed-line telecommunications market is valued as the revenues obtained by operators for voice telephony and internet fixed lines (wirelines), rather than wireless systems. Only revenues from end-users are included, with revenues from other operators, as in wholesale transactions, excluded. This market consists of voice telephony segments Circuit-Switched and VoIP (packet-switched voice subscriptions); and internet segments Narrowband (transmission speed 128 Kbps). Volume figures are defined as fixed-line subscriptions to each of these services. The wireless telecommunications services market is defined here as including cellular (mobile) phones, pagers, and any other wireless or cellular telecommunication service.

The Portuguese telecommunication services market had total revenues of \$4.1bn in 2020, representing a compound annual rate of change (CARC) of -1.4% between 2016 and 2020.

Market consumption volume increased with a compound annual growth rate (CAGR) of 3.4% between 2016 and 2020, to reach a total of 42.5 million total subscriptions in 2020.

Portugal has a medium-sized telecom market with a strong mobile sector and a growing broadband customer base focused on the delivery of fiber-based services.
