Transportation Services Global Industry Almanac - Market Summary, Competitive Analysis and Forecast, 2016-2025

SUMMARY

Global Transportation Services industry profile provides top-line qualitative and quantitative summary information including: industry group size (value 2016-20, and forecast to 2025). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the industry group.

KEY HIGHLIGHTS

The transportation services industry consists of the air, marine, rail, and road freight sectors.

The air freight sector is valued as the revenues generated by airlines from the transportation of cargo and mail by air, either on dedicated freighter aircraft or as belly cargo on passenger aircraft. Scheduled and charter services are both included.

The marine freight sector is defined as consisting of revenues generated from freight transportation by ship of container and dry bulk cargo, by sea and ocean-going vessels.

The rail freight sector is valued as the revenues generated from freight

transportation by rail.

The road freight sector is valued as revenues generated from freight transportation by road.

For all sectors, domestic and international carriage is included. To avoid doublecounting in regional and global markets, international freight revenues are assigned to the country of origin.

All market data and forecasts are represented in nominal terms (i.e., without adjustment for inflation) and all currency conversions used in the creation of this report have been calculated using constant 2020 annual average exchange rates.

Forecast figures presented in this report are calculated using crisis scenarios for the market. The length of the pandemic and restrictions introduced by various countries are still difficult to predict. Many governments had introduced the national lockdowns and temporarily banned sales of products that are deemed "non-essential". As the length of the pandemic and its impact on this market is not certain, the data used in this report has been modeled taking forecast impacts on national economics into consideration.

The global transportation services industry group had total revenues of \$2,388.3bn in 2020, representing a compound annual growth rate (CAGR) of 2.7% between 2016 and 2020.

The road segment was the industry group's most lucrative in 2020, with total revenues of \$1,518.0bn, equivalent to 63.6% of the industry group's overall value.

The value of the global transportation services industry group declined by 6.7% in 2020, with the COVID-19 pandemic disrupting the supply and demand for goods, as well as their flow through transportation means.
