### KEY HIGHLIGHTS

Civil aerospace manufacturing refers to all non-military and non-state aviation, and it includes revenue of top 100 aerospace producers. Value represents the revenue obtained by manufacturers. All market data and forecasts are represented in nominal terms (i.e., without adjustment for inflation) and all currency conversions used in the creation of this report have been calculated using constant 2021 annual average exchange rates.

The US civil aerospace market is expected to generate total revenues of \$340.0 billion in 2022, representing a compound annual growth rate (CAGR) of -1.7% between 2017 and 2022.

The US civil aerospace market was subject to woes even before the pandemic. US-based Boeing's revenues were significantly hit following the two fatal

crashes of its new Boeing 737 MAX in 2019 and 2020 due to technical faults in flight control.

Slower growth in 2022 came from another slump in business and consumer confidence following the energy crisis and rising inflation, which induced economic uncertainty.
