United States of America (USA) Pharmaceuticals Market @Summary, Competitive Analysis and Forecast to 2026

SUMMARY

Pharmaceuticals in the United States industry profile provides top-line qualitative and quantitative summary information including: market size (value 2016-21, and forecast to 2026). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

KEY HIGHLIGHTS

The pharmaceuticals market consists of ethical drugs only and does not include consumer healthcare or animal healthcare.

The US pharmaceuticals market had total revenues of \$397.0 billion in 2021, representing a compound annual growth rate (CAGR) of 4.3% between 2016 and 2021.

The US government continued to invest heavily in pharmaceutical companies in 2021 to accelerate the development, manufacture, and procurement of COVID-19 vaccines and therapeutics. This has resulted in stable growth of the pharmaceuticals market.

New policies by the US government to reduce the pricing of medications and

build an affordable healthcare system could contribute to a slowdown in market growth. As healthcare becomes more affordable and accessible, the ability of pharmaceutical companies to freely set prices will become limited.
