Utilities Global Industry Guide 2017-2021

SUMMARY

Global Utilities industry profile provides top-line qualitative and quantitative summary information including: market size (value 2012-16, and forecast to 2021). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

SYNOPSIS

Essential resource for top-line data and analysis covering the global utilities market. Includes market size and segmentation data, textual and graphical analysis of market growth trends and leading companies.

KEY HIGHLIGHTS

The utilities industry consists of the electricity, gas and water markets.

The electricity retailing market consists of the net consumption of electricity by end-users, segmented by industrial, transportation, commercial & public services, and residential consumption.

The gas utilities market covers all natural gas consumption, net of distribution or transmission losses, by end-users in the following categories: industrial (including use as a feedstock and autogeneration), commercial and public-sector organizations, residential consumers, electric power generation (including combined heat and power but excluding autogeneration and heat plant), and

other (including transport, agriculture, centralized heat plant, and other usage). Values are calculated from segment volumes and the average annual Henry Hub price of gas charged applied to each segment net of any applicable taxes.

The water utilities industry consists of all water that is collected, treated and distributed to agricultural, industrial, and residential end-users.

All currency conversions used in the creation of this report have been calculated using constant 2016 annual average exchange rates.

The global utilities industry had total revenues of \$3,333.6bn in 2016, representing a compound annual growth rate (CAGR) of 4.5% between 2012 and 2016.

The electricity segment was the industry's most lucrative in 2016, with total revenues of \$2,358.6bn, equivalent to 70.8% of the industry's overall value.

Higher wages are helping to create a consumer society and improve the quality of housing, increasing the energy demands of the average person. This will sustain growth in the industry during the foreseeable future, as will continued wider economic growth which tends to make larger demands of utility services.
