SUMMARY

Waste Management in Singapore industry profile provides top-line qualitative and quantitative summary information including: market size (value 2016-20, and forecast to 2025). The profile also contains descriptions of the leading players including key financial metrics and analysis of competitive pressures within the market.

KEY HIGHLIGHTS

The waste management industry consists of all municipal solid waste (MSW) - including non-hazardous waste generated in households, commercial establishments and institutions, and non-hazardous industrial process wastes, agricultural waste and sewage sludge.

The Singaporean waste management industry had total revenues of \$0.4bn in 2020, representing a compound annual growth rate (CAGR) of 0.7% between 2016 and 2020.

Industry consumption volumes declined with a compound annual rate of change (CARC) of -0.6% between 2016 and 2020, to reach a total of 7.5 million tons in 2020.

Singapore's tiny size means that it has little room for waste disposal, so it

encourages recycling.
