KEY HIGHLIGHTS

The waste management industry consists of all municipal solid waste (MSW) including non-hazardous waste generated in households, commercial establishments and institutions, and non-hazardous industrial process wastes, agricultural wastes and sewage sludge.

The Singaporean waste management industry had total revenues of \$172.0m in 2019, representing a compound annual rate of change (CARC) of -0.2% between 2015 and 2019.

Industry consumption volumes declined with a CARC of -0.8% between 2015 and 2019, to reach a total of 2.9 billion tons in 2019.

Singapore's tiny size means that it has little room for waste disposal, so it encourages recycling.
