Abstracts

The automotive 3D printing market is projected to grow from USD 2.9 billion in 2022 to USD 7.9 billion by 2027, at a CAGR of 21.7%. The increase in demand to reduce vehicle weight, production cost, and development time and increasing initiatives & investments by major OEMs are the major factors driving the growth of the automotive 3D printing market.

3D printing in the automotive sector helps OEMs reduce cost and produce cost-effective auto parts in reduced production time. Even though the implementation of this new technology is challenging at the beginning, OEMs have experienced positive impact on their production process and end products. Thus, OEMs have intensified their investments in 3D printing and made it a vital part of their manufacturing process.

Companies are investing heavily in R&D, which would supplement the growth of the 3D printing market. Various technological advancements in 3D printing techniques and materials in the past two decades have paved the way for new technologies that facilitate the production of various custom products. Industry leaders such as Stratasys (Israel) and 3D Systems (US) have invested significantly in 3D printing technology, which gives them a competitive advantage.

A key factor restricting the adoption of 3D printing is the high cost associated with 3D printing materials; the cost of 3D printing materials is generally higher than bulk resin or powder counterparts. This high cost is attributed to factors such as the high level of

purity and the need for uniformity in composition and size for specific 3D printing processes. The limited availability of 3D printing material suppliers compels customers to buy proprietary material from big players, which results in high costs.

The progression of 3D printing applications from rapid prototyping to direct digital manufacturing (DDM) of products has generated interest in the future applications of 3D printing technologies in diverse fields such as healthcare, consumer products, and automotive. 3D printing possesses substantial commercial potential and will likely have a significant impact on various industries, including aerospace and medical, with more customized and sophisticated applications expected soon.

With the increasing industrialization of technologies, the 3D printing market is also booming in various sectors. The most notable growth is Desktop Metal, which went from a startup to one of the leading players in the 3D printing market. In 2017, the most common application of 3D printing was rapid prototyping. However, now the trend is shifting to R&D. In 2021, R&D applications surpassed prototyping as the most popular 3D printing application. The percentage of companies leveraging 3D printing to build production parts and jigs, fixtures, and tooling has roughly doubled since 2017 and use for production parts has nearly tripled.

The hardware segment is expected to be the leading during the forecast period

The 3D printing market offers software and hardware for various applications in the automotive industry. The hardware offering has the leading share on the offerings landscape and is estimated to lead the market in the forecast period. The growing sales and the wide adoption of the hardware such as 3D printers by the manufacturers are the driving factors for the offering to lead the market globally. The advancements have helped automakers increase their production volume and reduce production costs. Automotive manufacturers are also using 3D printing for structurally complex and critical components, improving the components' efficiency, life, and performance. The evolution of electric vehicles is resulting in more hardware used by the automotive industry. The low-volume production in the initial phase of electric vehicles can easily be handled using additive manufacturing economically and efficiently.

The hardware segment is growing as 3D printer manufacturers are consistently developing and updating their 3D printers and machines to suit the requirements of consumers and their applications. Hardware's leading segment in the offering is driven by the growing sales globally. The advancements have helped automakers increase their production volume and reduce production costs

Europe is expected to witness significant growth during the forecast period

The European market is expected to exhibit growth in electric and autonomous vehicle production in the coming years, resulting in an increase in demand for 3D printing. Europe's vibrant R&D landscape and technological excellence aid the usage of additive manufacturing for the development of prototypes, tooling, and production components. Additionally, the advent of autonomous cars and development of an electric transportation system for buses and trucks would drive the European automotive 3D printing market.

In-depth interviews have been conducted with the target group, as listed below, for industry-related data, technological information, and validation of analysis.

Automotive component manufacturers

3D machine (3D printers, scanners, imaging devices) manufacturers

3D printing material suppliers

3D printing software providers

3D printing-related associations, organizations, forums, and alliances

Stratasys (Israel), 3D Systems, Inc. (US), EOS (Germany), Arcam AB (Sweden), Renishaw plc. (UK), HP (US), Materialise (Belgium) are the prominent players in the automotive 3D printing market.

Research Coverage:

The study segments the automotive 3D printing market and forecasts the market size based on By application (prototyping & tooling, research, development & innovation, manufacturing complex components, and others), by technology (Stereolithography, Selective Laser Sintering, Electron Beam Melting (EBM), Fused Deposition Modeling, Laminated Object Manufacturing, Three Dimensional Inject Printing, and others), by material (metals - aluminum, titanium, metal alloys, and stainless steel; plastics - acrylonitrile butadiene styrene (ABS), nylon, polylactic acid (PLA), and others; resin & composites; and others, by offering (hardware & software), by vehicle type (ICE

vehicles & electric vehicles), by component (interior components & exterior components) and by region (Asia Pacific, Europe, North America, and Rest of the World).

The study also includes an in-depth competitive analysis of the major automotive 3D printing manufacturers in the market, along with their company profiles, key observations related to product and business offerings, recent developments, and key market strategies.

Key Benefits of Buying the Report:

The report will help the market leaders/new entrants in this market with the information on the closest approximations of the revenue numbers for the overall automotive 3D printing market and the sub-segments. This report will help stakeholders understand the competitive landscape and gain more insights to better position their businesses and plan suitable go-to-market strategies. The report also helps stakeholders understand the market's pulse and provides them information on key market drivers, restraints, challenges, and opportunities.

16 RECOMMENDATIONS BY MARKETSANDMARKETS

16.1 EUROPE IS EXPECTED TO GROW RAPIDLY IN AUTOMOTIVE 3D PRINTING MARKET

16.2 3D-PRINTED ELECTRIC VEHICLE COMPONENTS TO BE KEY FOCUS AREA

16.3 INCREASED CUSTOMIZATION OPTIONS THROUGH 3D PRINTING TO BE ANOTHER KEY FOCUS AREA

16.4 CONCLUSION

17 APPENDIX

17.1 INSIGHTS FROM INDUSTRY EXPERTS

17.2 DISCUSSION GUIDE

17.3 KNOWLEDGESTORE: MARKETSANDMARKETS' SUBSCRIPTION PORTAL

17.4 AVAILABLE CUSTOMIZATION

17.4.1 AUTOMOTIVE 3D PRINTING MARKET, BY COMPONENT AND SERVICE

17.4.1.1 Asia Pacific

17.4.1.1.1 China

17.4.1.1.2 India

17.4.1.1.3 Japan

17.4.1.1.4 South Korea

17.4.1.1.5 Rest of Asia Pacific

17.4.1.2 Europe

17.4.1.2.1 Germany

17.4.1.2.2 France

17.4.1.2.3 UK

17.4.1.2.4 Spain

17.4.1.2.5 Italy

17.4.1.2.6 Rest of Europe

17.4.1.3 North America

17.4.1.3.1 US

17.4.1.3.2 Canada

17.4.1.3.3 Mexico

17.4.1.4 RoW

17.4.1.4.1 Brazil

17.4.1.4.2 Russia

17.4.1.4.3 Others

17.4.2 AUTOMOTIVE 3D PRINTING MARKET, BY OFFERING AND SERVICE

17.4.2.1 Asia Pacific

17.4.2.1.1 China

17.4.2.1.2 India

17.4.2.1.3 Japan

17.4.2.1.4 South Korea

17.4.2.1.5 Rest of Asia Pacific

17.4.2.2 Europe

17.4.2.2.1 Germany

17.4.2.2.2 France

17.4.2.2.3 UK

17.4.2.2.4 Spain
