Abstracts

The 3D printing market is projected to reach from USD 15.0 billion in 2023 to USD 34.5 billion by 2028, at a CAGR of 18.1%. Some key factors attributing to the growth of 3D printers involve ease in developing customized products, reduction in manufacturing cost and process downtime, government investments in 3D printing projects, and development of new industrial-grade 3D printing materials.

The recession's impact on the 3D printing market has been analyzed in this study. The short-term outlook for semiconductors and materials revenues is expected to be worse in the third quarter of 2023. Rising inflation, increasing interest rates, unemployment, and energy crises will lead to slow economic activity. As a result, end-user industries experience deterioration of their businesses, cash flow, and ability to obtain financing, delaying or canceling product purchase plans.

Industrial printer market to hold a significant share of the 3D printer market during the forecast period

Industrial printers are used for professional and production purposes in the aerospace & defense, automotive, healthcare, consumer products, energy, jewellery, and engineering industries. Industrial printers are used to generate concept models,

precision and functional prototypes, master patterns and molds for tooling, visual and functional prototypes, and real end-use parts. These printers use powders to develop molds and parts with superior accuracy up to 28 µm layer thickness. High-performance materials, resins, metals, and alloys are mixed to develop extremely resistant, flexible, and strong parts.

FDM technology to hold the largest share of 3D printing market during the forecast period

FDM technology can produce prototypes and functional parts faster and at a low cost from various thermoplastic materials. The lead times of FDM are short (as fast as next-day delivery) due to the high availability of the technology. A wide range of thermoplastic materials is available for prototyping and non-commercial functional applications. These materials are used to manufacture high-precision plastic components. FDM is a clean, simple-to-use, and office-friendly 3D printing technology. It supports production-grade thermoplastics, which are mechanically and environmentally stable, and the technology is used to develop complex geometries and cavities. Stratasys (US), Ultimaker (Netherlands), and Afinia 3D (US) are some of the leading companies providing FDM-based 3D printing systems and services.

Consumer products vertical for 3D printing market is expected to grow at the second highest CAGR during the forecast period

The 3D printing market for consumer products has been growing with the rise in the adoption of desktop or personal printers. The introduction of low-cost desktop 3D printers, costing below USD 1,000, has driven the adoption of 3D printers. Many start-up companies have entered the 3D printing industry with their services, such as designing, prototyping, or manufacturing customized functional products. Even the e-commerce giants such as Amazon (US), Staples (US), and the UPS Store (US) have entered the 3D printing market by providing customized consumer products as well as selling various branded desktop 3D printers.

Europe to hold a significant share of the 3D printing market during the forecast period

Europe is projected to hold a significantly large share for 3D printing market during the forecast period. Germany and the UK are the major countries contributing to the 3D printing market in Europe. The technique is widely used in the consumer, aerospace, automobile, and healthcare industries. Technological advancements, increased availability of various raw materials, regulatory policies, government support, low

financial requirements, and the ability to facilitate fast and accurate product development are the major factors driving the 3D printing market in Europe. The European Space Agency (ESA) recently developed an X-Ray telescope using plasma metal deposition 3D printing. The ESA space telescope is designed to search for black holes and hot map structures to determine their physical properties. The demonstrator parts of this telescope will be designed and 3D printed by RHP Technology, an Austrian company.

In the process of determining and verifying the market size for several segments and subsegments gathered through secondary research, extensive primary interviews have been conducted with key industry experts in the 3D printing market space. The break-up of primary participants for the report has been shown below:

By Company Type: Tier 1 – 35%, Tier 2 – 40%, and Tier 3 – 25%

By Designation: C-level Executives – 30%, Directors – 40%, and Others – 30%

By Region: North America –40%, Asia Pacific– 25%, Europe – 30%, and RoW – 5%

The report profiles key players in the 3D printing market with their respective market ranking analysis. Prominent players profiled in this report are Intuitive Surgical (US), DJI (China), Daifuku (Japan), iRobot (US), Samsung Electronics (South Korea), JD.com Inc. (China), DeLaval (Sweden), Kongsberg Maritime (Norway), and Northrop Grumman (US) among others.

Research Coverage:

This research report categorizes the 3D printing market on the basis of type, component, environment, application, and geography. The report describes the major drivers, restraints, challenges, and opportunities pertaining to the 3D printing market and forecasts the same till 2028 (including analysis of recession impact on the market). Apart from these, the report also consists of leadership mapping and analysis of all the companies included in the 3D printing ecosystem.

Key Benefits of Buying the Report

The report would help leaders/new entrants in this market in the following ways:

1. This report segments the 3D printing market comprehensively and provides the closest market size projection for all subsegments across different regions.
2. The report helps stakeholders understand the pulse of the market and provides them with information on key drivers, restraints, challenges, and opportunities for market growth.
3. This report would help stakeholders understand their competitors better and gain more insights to improve their position in the business. The competitive landscape section includes competitor ecosystem, product developments and launches, partnerships, and mergers and acquisitions.
4. The analysis of the major 25 companies, based on the strength of the market rank as well as the product footprint will help stakeholders visualize the market positioning of these key players.
5. Patent analysis, trade data, porters five forces analysis, and technological analysis that will shape the market in the coming years has also been covered in this report.

5 MARKET OVERVIEW

5.1 INTRODUCTION

5.2 MARKET DYNAMICS

FIGURE 19 DRIVERS, RESTRAINTS, OPPORTUNITIES, AND CHALLENGES: 3D PRINTING MARKET

FIGURE 20 IMPACT OF DRIVERS ON 3D PRINTING MARKET

FIGURE 21 IMPACT OF OPPORTUNITIES ON 3D PRINTING MARKET

FIGURE 22 IMPACT OF RESTRAINTS AND CHALLENGES ON 3D PRINTING MARKET

5.2.1 DRIVERS

5.2.1.1 Ease in development of customized products

5.2.1.2 Reduction in manufacturing cost and process downtime

5.2.1.3 Global government investment in 3D printing projects

TABLE 1 GLOBAL GOVERNMENT FUNDING FOR 3D PRINTING PROJECTS

5.2.1.4 Availability of wide variety of industrial-grade 3D printing materials

5.2.2 RESTRAINTS

5.2.2.1 Lack of standardized testing methods to verify mechanical properties of 3D printing materials and high cost of raw materials

5.2.2.2 Inadequate design and process control data due to lack of printing material specifications

5.2.3 OPPORTUNITIES

5.2.3.1 Increasing demand for medical products and supplies in post-pandemic scenario

5.2.3.2 Rapid advancements in printing technologies and materials and development of knowledge and skills progression framework

5.2.3.3 Emerging applications of 3D printing technology in automotive, printed electronics, jewelry, and education fields

5.2.4 CHALLENGES

5.2.4.1 Ensuring consistent quality of final 3D product with repeatable and stable production processes

5.2.4.2 Threat of copyright infringement

5.2.4.3 Decline in sales of 3D printing devices due to recession impact

5.3 CASE STUDIES

5.3.1 ASHLEY FURNITURE MANUFACTURED REPLACEMENT AND SPARE PARTS USING 3D PRINTING TECHNOLOGY TO REDUCE OVERALL COST

5.3.2 FLASHFORGE DEVELOPED 3D PRINTING SOLUTIONS TO UPGRADE CHANNEL LETTER PRODUCTION TECHNOLOGY AT REDUCED COST

5.3.3 3D PRINTED TECHNOLOGY WAS ADOPTED BY ADIDAS TO MANUFACTURE STANDARD MIDSOLES AND BY BOA TO PRODUCE FASTENERS FOR SNEAKERS

5.3.4 DLR INCORPORATED ADDITIVE MANUFACTURING TO OPTIMIZE FLUID DYNAMICS

5.3.5 ACS USED 3D PRINTERS TO PRINT CUSTOM EAR PRODUCTS, HEARING AIDS, AND EARPHONES IN BULK

5.3.6 PORSCHE ADOPTED ADDITIVE MANUFACTURING TECHNIQUE TO PRODUCE EV PARTS

5.3.7 DECATHLON AND COBRA GOLF USED 3D PRINTING TECHNOLOGY TO DESIGN SPORTS EQUIPMENT

5.3.8 NEXA3D AND FORM LABS DEVELOPED NASOPHARYNGEAL (NP) SWABS AND FACE SHIELDS USING 3D PRINTING TECHNIQUE TO COPE WITH COVID-19

5.3.9 WAVEOPTICS AND LUXECEL CREATED 3D-PRINTED MODULE TO DESIGN AND MANUFACTURE LENSES AND EYEGLASSES

5.3.10 BMW INCORPORATED 3D PRINTERS TO PRODUCE POLYMER PARTS USING MULTI-JET FUSION AND SELECTIVE LASER SINTERING TECHNIQUES

5.4 PRICING ANALYSIS

5.5 VALUE CHAIN ANALYSIS

FIGURE 23 MATERIAL AND SOFTWARE PROVIDERS AND MANUFACTURERS TO CONTRIBUTE TO MAXIMUM VALUE

TABLE 138 NORTH AMERICA: 3D PRINTING MARKET, BY COUNTRY, 2023–2028 (USD MILLION)

11.2.1 US

11.2.1.1 Huge venture capital investments in 3D printing technology to accelerate market growth

11.2.2 CANADA

11.2.2.1 Automotive and healthcare verticals to contribute to 3D printing market growth

11.2.3 MEXICO

11.2.3.1 Focus of companies and universities to increase awareness about benefits of 3D printing technology to drive market

11.3 EUROPE

FIGURE 39 SNAPSHOT: 3D PRINTING MARKET IN EUROPE

TABLE 144 EUROPE: 3D PRINTING MARKET, BY COUNTRY, 2023–2028 (USD MILLION)

11.3.1 GERMANY

11.3.1.1 Increasing demand for 3D printing by automobile companies in seat and car interior applications to propel market

11.3.2 UK

11.3.2.1 Government funding for cutting-edge technology-related programs to foster use of 3D printing technology in newer applications

11.3.3 FRANCE

11.3.3.1 Growing use of 3D printing in implants and prosthetics to drive market

11.3.4 ITALY

11.3.4.1 Aerospace, automotive, healthcare, and consumer products verticals to be key enablers of 3D printing technology

11.3.5 SPAIN

11.3.5.1 Focus of private companies to invest in 3D printing-related innovations to expedite market growth

11.3.6 REST OF EUROPE

11.4 ASIA PACIFIC
