## **Abstracts**

The 3D printing materials market is projected to grow from USD 2.5 billion in 2022 to USD 7.9 billion by 2027, at a CAGR of 25.6% during the forecasted period. The 3D printing materials market is primarily driven by factors such as ease in the development of customized products and reduction in manufacturing costs and process downtime.

3D printing is being adopted at a very high rate across various end-use industries owing to the mass customization offered by this process. Plastics and metals are being mainly used to create complex objects in the healthcare, automotive, and aerospace & defense industries. The increasing adoption of home 3D printers in the North American and European regions is one of the major factors augmenting the demand for 3D printing materials. High material costs and higher lead time are some of the factors hindering the growth of the 3D printing materials market.

“In terms of value, metals accounted for the largest share of the overall 3D printing materials market.”

The aerospace & defense end-use industry is one of the early adopters of 3D printing metal materials, and various countries have approved the adoption of 3D printing using metal. For instance, in June 2020, IAI produced SkysPrinter, the first fully 3D-printed drone for Israel for the defense department. The UAV was made from 26 parts 3D printed using metal, nylon, carbon, and other complex materials. Along with aerospace & defense, the automotive sector is also one of the prominent users of metal materials.

Various automobile manufacturers have adopted 3D printing to produce car body parts.

“During the forecast period, the 3D printing materials market in the automotive industry is expected to register the second-highest CAGR.”

In the automotive industry, 3D printing has primarily been used for rapid prototyping and testing of automotive components. 3D-printed automotive prototypes are created primarily to study the feasibility of automobiles through live testing. The automotive industry was one of the first to use 3D printing technology for prototyping purposes. Using this technology, it has already printed a complete car. Some luxury car manufacturers in Europe and North America have already adopted 3D printing technology for the mass production of automobile components.

“During the forecast period, the 3D printing materials market in Asia Pacific is projected to register the highest CAGR.”

Asia Pacific is the fastest-growing market and the third major consumer of 3D printing materials globally. The 3D printing materials market in the Asia Pacific is considered for China, Japan, South Korea, India, and the Rest of Asia Pacific. The Asia Pacific region is an emerging and lucrative market for 3D printing materials owing to industrial developments and improving economic conditions. This region constitutes approximately 60% of the world's population, resulting in the growth of various industries such as automotive, consumer goods, and construction.

This study has been validated through primary interviews with industry experts globally. These primary sources have been divided into the following three categories:

By Company Type- Tier 1- 40%, Tier 2- 33%, and Tier 3- 27%

By Designation- C Level- 50%, Director Level- 30%, and Others- 20%

By Region- North America- 15%, Europe- 50%, Asia Pacific (APAC) - 20%, Latin America-5%, Middle East & Africa (MEA)-10%

The report provides a comprehensive analysis of company profiles:

3D Systems, Inc. (US), Arkema (France), Stratasys (US), General Electric (US), EOS

*3D Printing Materials Market by Form (Powder, Liquid, Filament), Type (Plastic, Metal, Ceramic), Technology, A...*

GmbH (Germany), Materialise (Belgium), Sandvik AB (Sweden), H?gan?s AB (Sweden), Evonik Industries AG (Germany), BASF SE (Germany), Henkel AG & CO. KGaA (Germany), Solvay (Belgium).

## Research Coverage

This report covers the global 3D printing materials market and forecasts the market size until 2027. It includes the following market segmentation-By Type (Plastics, Metals, Ceramics, and Others), By Form (Powder, Filament, and Liquid), By Technology (FDM, SLS, SLA, DMLS, and Others), By Application (Prototyping, Manufacturing, Others), By End-Use Industry (Aerospace & Defense, Healthcare, Automotive, Consumer Goods, Construction, and Others) and Region (North America, Europe, Asia Pacific, Middle East & Africa, Latin America) - Global Forecast to 2027. Porter's Five Forces Analysis, along with the drivers, restraints, opportunities, and challenges, have been discussed in the report. It also provides company profiles and competitive strategies adopted by the major players in the global 3D printing materials market.

## Key benefits of buying the report:

The report is expected to help market leaders/new entrants in this market in the following ways:

1. This report segments the global 3D printing materials market comprehensively. It provides the closest approximations of the revenues for the overall market and the sub-segments across different verticals and regions.
2. The report helps stakeholders understand the pulse of the 3D printing materials market and provides them with information on key market drivers, restraints, challenges, and opportunities.
3. This report will help stakeholders to understand competitors better and gain more insights to better their position in their businesses. The competitive landscape includes the competitor ecosystem, new product development, agreement, contract, expansion, and acquisition.

## Reasons to buy the report:

The report will help leaders/new entrants in this market by providing them with the closest approximations of the revenues for the overall 3D printing materials market and the sub-segments. This report will help stakeholders to understand the competitive landscape and gain more insights and position their businesses and market strategies

in a better way.

## Contents

### 1 INTRODUCTION

- 1.1 STUDY OBJECTIVES
- 1.2 MARKET DEFINITION
  - 1.2.1 INCLUSIONS AND EXCLUSIONS
- 1.3 MARKET SCOPE
  - 1.3.1 3D PRINTING MATERIALS MARKET SEGMENTATION
  - 1.3.2 REGIONS COVERED
  - 1.3.3 YEARS CONSIDERED
- 1.4 CURRENCY CONSIDERED
- 1.5 UNITS CONSIDERED
- 1.6 LIMITATIONS
- 1.7 STAKEHOLDERS
- 1.8 SUMMARY OF CHANGES

### 2 RESEARCH METHODOLOGY

- 2.1 RESEARCH APPROACH
  - FIGURE 1 RESEARCH DESIGN
- 2.2 BASE NUMBER CALCULATION
  - 2.2.1 SUPPLY-SIDE APPROACH 1
  - 2.2.2 SUPPLY-SIDE APPROACH 2
  - 2.2.3 DEMAND-SIDE APPROACH
- 2.3 IMPACT OF RECESSION
- 2.4 FORECAST NUMBER CALCULATION
- 2.5 RESEARCH DATA
  - 2.5.1 SECONDARY DATA
    - 2.5.1.1 Key data from secondary sources
  - 2.5.2 PRIMARY DATA
    - 2.5.2.1 Key data from primary sources
    - 2.5.2.2 Primary interviews – Top 3D printing materials manufacturers
    - 2.5.2.3 Breakdown of primary interviews
    - 2.5.2.4 Key industry insights
- 2.6 MARKET SIZE ESTIMATION
  - 2.6.1 BOTTOM-UP APPROACH
    - FIGURE 2 BOTTOM-UP APPROACH
  - 2.6.2 TOP-DOWN APPROACH

FIGURE 3 TOP-DOWN APPROACH

2.7 DATA TRIANGULATION

### 5 MARKET OVERVIEW

#### 5.1 MARKET DYNAMICS

##### FIGURE 19 DRIVERS, RESTRAINTS, OPPORTUNITIES, AND CHALLENGES IN 3D PRINTING MATERIALS MARKET

###### 5.1.1 DRIVERS

- 5.1.1.1 Ease in development of customized products
- 5.1.1.2 Reduction in manufacturing cost and process downtime
- 5.1.1.3 Mass customization
- 5.1.1.4 Development of new industrial-grade 3D printing materials

###### 5.1.2 RESTRAINTS

- 5.1.2.1 High cost of materials
- 5.1.2.2 Lack of standard process control

###### 5.1.3 OPPORTUNITIES

- 5.1.3.1 Adoption of 3D printing technology in home printing
- 5.1.3.2 Growing demand from education sector
- 5.1.3.3 Rising demand from aerospace & defense and automotive sectors
- 5.1.3.4 Government investments in 3D printing projects

##### TABLE 1 GOVERNMENT INVESTMENTS IN 3D PRINTING PROJECTS

###### 5.1.4 CHALLENGES

- 5.1.4.1 Production of low-cost 3D printing materials
- 5.1.4.2 Reducing lead time

#### 5.2 PORTER'S FIVE FORCES ANALYSIS

##### FIGURE 20 PORTER'S FIVE FORCES ANALYSIS

- 5.2.1 BARGAINING POWER OF BUYERS
- 5.2.2 BARGAINING POWER OF SUPPLIERS
- 5.2.3 THREAT OF NEW ENTRANTS
- 5.2.4 THREAT OF SUBSTITUTES
- 5.2.5 INTENSITY OF COMPETITIVE RIVALRY

##### TABLE 2 PORTER'S FIVE FORCES ANALYSIS

#### 5.3 KEY STAKEHOLDERS AND BUYING CRITERIA

##### 5.3.1 KEY STAKEHOLDERS IN BUYING PROCESS

##### FIGURE 21 INFLUENCE OF STAKEHOLDERS IN BUYING PROCESS FOR TOP THREE END-USE INDUSTRIES

##### TABLE 3 INFLUENCE OF STAKEHOLDERS IN BUYING PROCESS FOR TOP THREE END-USE INDUSTRIES

## About

The technology of printing a three-dimensional object from a digital file using materials such as plastic, metal, ceramics, and others is called 3D printing and the materials used are called 3D printing materials. With the latest technologies and innovative materials, 3D printing has become a revolution. This revolutionary technology has the ability to completely alter the dynamics of the manufacturing sector. 3D printing finds majority of its applications in printing parts or objects in industries such as, aerospace, medical, consumer goods, automotive, and others. The types of materials can be classified into plastics, metals, ceramics, and others that include resins, electronic materials, wax, laywood, and so on.

### Objectives Of The Study

- To define and segment the global 3D printing materials market by form, type, and application
- To estimate and forecast the global 3D printing materials market in terms of value (\$million) and volume (metric tons)
- To estimate and forecast the 3D printing materials market, by form, type, and application at country level in different regions namely, Asia-Pacific, Europe, North America, and Rest of the World (RoW) and to analyze significant region-specific trends in these regions
- To identify and analyze the key growth drivers, restraints, and opportunities influencing the 3D printing materials market
- To strategically identify and profile the key market players and analyze their core competencies in each type and application of the 3D printing materials market
- To analyze recent market developments and competitive strategies, such as alliances, joint ventures, and mergers & acquisitions to draw the competitive landscape in the 3D printing materials market

## I would like to order

Product name: 3D Printing Materials Market by Form (Powder, Liquid, Filament), Type (Plastic, Metal, Ceramic), Technology, Application, End-Use Industry (Automotive, Aerospace & Defence, Healthcare, Consumer Goods, Construction), and Region - Global Forecast to 2027

Product link: <https://marketpublishers.com/r/34929F941F2EN.html>

Price: US\$ 4,950.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:

[info@marketpublishers.com](mailto:info@marketpublishers.com)

## Payment

To pay by Credit Card (Visa, MasterCard, American Express, PayPal), please, click button on product page <https://marketpublishers.com/r/34929F941F2EN.html>

To pay by Wire Transfer, please, fill in your contact details in the form below:

First name:  
Last name:
