## **Abstracts**

The 3D printing plastics market is estimated at USD 1.7 billion in 2023 and is projected to reach USD 4.4 billion by 2028, at a CAGR of 22.0% from 2023 to 2028. ABS (Acrylonitrile Butadiene Styrene) is a commonly used plastic in 3D printing, particularly in fused deposition modeling (FDM) technology. It is known for its flexibility and impact resistance, making it suitable for a wide range of applications, including the production of Lego bricks, car body parts, household appliances, and roofing applications. The growth factors for ABS in 3D printing include its versatility and wide range of applications, especially in industries such as automotive, defense, and consumer goods.

“In terms of value, powder form segment accounted for the third largest share of the overall 3D printing plastics market.”

3D printing plastics in powder form is a growing market, with North America being the leading region for powder form 3D printing plastics. The demand for 3D printing plastics has grown significantly in creating prototypes, and more manufacturers are expected to utilize additive manufacturing for high-volume production. The market for powder form 3D printing plastics is expected to continue growing, driven by the demand for additive manufacturing in various industries and the development of new biocompatible materials.

“In terms of value, consumer goods industry accounted for the fourth largest share of the overall 3D printing plastics market.”

In 2022, the consumer goods industry accounted for the fourth largest share of the 3D printing plastics market, in terms of value. This is attributed to the 3D printing plastics used to create customized consumer electronics, such as smartphone cases, headphones, and gaming controllers, that can be tailored to the specific needs of individual consumers. This improve the functionality and user experience of the products. 3D printing also used to create customized toys and games, such as action figures, puzzles, and board games, that can be tailored to the specific needs and preferences of individual consumers. This improve the entertainment value and educational benefits of the products. This scenarios are expected to drive consumption of 3D printing plastics in consumer good industry.

“During the forecast period, the 3D printing plastics market in North America region is projected to be the largest region.”

New product developments, capacity expansions, and the establishment of plants by various leading players in this region majorly drive the growth of the 3D printing plastics market in North America. Demand for composites from the automotive, aerospace & defense, and healthcare industries is projected to increase due to new product innovations and technological advancements in the applications of 3D printing plastics in these industries. In North America, the aerospace & defense, automotive, and healthcare are the major industries which have applications of 3D printing plastics.

This study has been validated through primary interviews with industry experts globally. These primary sources have been divided into the following three categories:

By Company Type- Tier 1- 37%, Tier 2- 33%, and Tier 3- 30%

By Designation- C Level- 50%, Director Level- 20%, and Others- 30%

By Region- Europe- 21%, Asia Pacific (APAC) - 28%, North America- 32%, Middle East & Africa (MEA)-12%, Latin America-7%

The report provides a comprehensive analysis of company profiles:

Prominent companies include 3D Systems Corporation (US), Arkema (France), BASF SE (Germany), Stratasys, Ltd. (US), Solvay (Belgium), Shenzhen eSUN Industrial Co., Ltd. (China), Evonik Industries AG (Germany), EOS (Germany), Formlabs (US), SABIC (Saudi Arabia), CRP TECHNOLOGY S.r.l. (Italy), Henkel AG & Co. KGaA (Germany), Huntsman International LLC (US), Ensinger (Germany), and Zortrax (Poland).

## Research Coverage

This research report categorizes the 3D printing plastics Market by type (Photopolymer, ABS, Polyamide, PLA, PETG, Others), form (Filament, Liquid, Powder), application (Prototyping, Manufacturing, Tooling), end-Use Industry (Healthcare, Aerospace & Defense, Automotive, Consumer Goods), and region (North America, Europe, Asia Pacific, the Middle East & Africa, and Latin America). The scope of the report includes detailed information about the major factors influencing the growth of the 3D printing plastics market, such as drivers, restraints, challenges, and opportunities. A thorough examination of the key industry players has been conducted in order to provide insights into their business overview, solutions, and services, key strategies, contracts, partnerships, and agreements. New product and service launches, mergers and acquisitions, and recent developments in the 3D printing plastics market are all covered. This report includes a competitive analysis of upcoming startups in the 3D printing plastics market ecosystem.

## Reasons to buy this report:

The report will help the market leaders/new entrants in this market with information on the closest approximations of the revenue numbers for the overall 3D printing plastics market and the subsegments. This report will help stakeholders understand the competitive landscape and gain more insights to position their businesses better and plan suitable go-to-market strategies. The report also helps stakeholders understand the pulse of the market and provides them with information on key market drivers, restraints, challenges, and opportunities.

## The report provides insights on the following pointers:

Analysis of key drivers (Increased supply of 3D printing plastics due to forward integration of key polymer companies, Development of application-specific grades, Mass Customization, Government initiatives to surge adoption of 3D printing technologies), restraints (Environmental concerns regarding disposal of 3D-printed plastic products, Skepticism on acceptance of new technologies in

emerging economies, Specific grades of 3D printing plastics for particular applications), opportunities (Increasing demand for bio-based grades of 3D printing plastics, Growing demand for composite grades in industrial applications), and challenges (Technological advancements in 3D printing, High manufacturing costs of commercial-grade 3D printing plastics) influencing the growth of the 3D printing plastics market

**Product Development/Innovation:** Detailed insights on upcoming technologies, research & development activities, and new product & service launches in the 3D printing plastics market

**Market Development:** Comprehensive information about lucrative markets – the report analyses the 3D printing plastics market across varied regions.

**Market Diversification:** Exhaustive information about new products & services, untapped geographies, recent developments, and investments in the 3D printing plastics market

**Competitive Assessment:** In-depth assessment of market shares, growth strategies and service offerings of leading players like 3D Systems Corporation (US), Arkema (France), BASF SE (Germany), Stratasys, Ltd. (US), Solvay (Belgium), Shenzhen eSUN Industrial Co., Ltd. (China), Evonik Industries AG (Germany), EOS (Germany), Formlabs (US), SABIC (Saudi Arabia), CRP TECHNOLOGY S.r.l. (Italy), Henkel AG & Co. KGaA (Germany), Huntsman International LLC (US), Ensinger (Germany), and Zortrax (Poland), among others in the 3D printing plastics market.

## 5 MARKET OVERVIEW

### 5.1 INTRODUCTION

### 5.2 MARKET DYNAMICS

FIGURE 19 DRIVERS, RESTRAINTS, OPPORTUNITIES, AND CHALLENGES IN 3D PRINTING PLASTICS MARKET

#### 5.2.1 DRIVERS

5.2.1.1 Increased supply of 3D printing plastics due to forward integration of key polymer companies

5.2.1.2 Development of application-specific plastic grades

5.2.1.3 Mass customization

5.2.1.4 Government initiatives to surge adoption of 3D printing technologies

#### 5.2.2 RESTRAINTS

5.2.2.1 Environmental concerns regarding disposal of plastic products

5.2.2.2 Skepticism on acceptance of new technologies in emerging economies

5.2.2.3 Regulations on use of specific grades of plastics

#### 5.2.3 OPPORTUNITIES

5.2.3.1 Increasing demand for bio-based plastic grades

5.2.3.2 Enhanced performance of composite grades in industrial applications

#### 5.2.4 CHALLENGES

5.2.4.1 Technological advancements in 3D printing

5.2.4.2 High manufacturing costs of commercial-grade plastics

### 5.3 PORTER'S FIVE FORCES ANALYSIS

FIGURE 20 3D PRINTING PLASTICS MARKET: PORTER'S FIVE FORCES ANALYSIS

#### 5.3.1 THREAT OF NEW ENTRANTS

#### 5.3.2 THREAT OF SUBSTITUTES

#### 5.3.3 BARGAINING POWER OF BUYERS

#### 5.3.4 BARGAINING POWER OF SUPPLIERS

#### 5.3.5 INTENSITY OF COMPETITIVE RIVALRY

TABLE 1 IMPACT OF PORTER'S FIVE FORCES ANALYSIS ON 3D PRINTING PLASTICS MARKET

### 5.4 SUPPLY CHAIN ANALYSIS

FIGURE 21 3D PRINTING PLASTICS MARKET: SUPPLY CHAIN ANALYSIS

### 5.5 VALUE CHAIN ANALYSIS

FIGURE 22 3D PRINTING PLASTICS MARKET: VALUE CHAIN ANALYSIS

### 5.5.1 RAW MATERIALS

### 5.5.2 MANUFACTURING

### 5.5.3 APPLICATIONS AND END-USE INDUSTRIES

## About

The report "3D Printing Plastics Market by Type (Photo polymer, ABS, Poly amide, PLA), Form (Filament, Liquid/Ink, Powder), End-Use Industry (Healthcare, Aerospace & Defense, Automotive, Electrical & Electronics), Application, and Region - Global Forecast to 2023" The 3D printing plastics market size is estimated to be USD 615.8 million in 2018 and is projected to reach USD 1,965.3 million by 2023, at a CAGR of 26.1% between 2018 and 2023. Factors such as increasing demand from the healthcare industry and growing demand in manufacturing activities influence the 3D printing plastics market. Aerospace & defense, automotive, and electrical & electronics are the other major end-use industries of 3D printing plastics.

### **Major companies profiled in this report include:**

3D Systems Corporation (US), Stratasys, Ltd. (US), Arkema SA (France), BASF SE (Germany), Evonik Industries AG (Germany), SABIC (Saudi Arabia), HP Inc. (US), DowDuPont Inc. (US), Royal DSM N.V. (Netherlands), EOS GmbH Electro Optical Systems (Germany), Clariant International Ltd. (Switzerland), CRP Group (US), Envisiontec GmbH (Germany), Materialise NV (Belgium), and Oxford Performance Materials Inc. (US). among others.

These companies are focused on promoting products based on 3D printing technology. Partnerships/joint agreements/collaborations between the 3D printing technology providers and the 3D printing plastics manufacturers are the major growth strategies observed in the market.

### **Research Coverage:**

This report offers an overview of the market trends, drivers, and challenges with respect to the 3D printing plastics market. It also provides a detailed overview of the market across five regions, namely, Asia Pacific, Europe, North America, the Middle East & Africa, and South America. The report categorizes the 3D printing plastics market on the basis of type, form, application, end-use industry, and region. A detailed analysis of leading players, along with key growth strategies adopted by them, is also covered in the report.

### **Photopolymer type segment to lead the 3D printing plastics market by 2023**

By type, the photopolymer segment is estimated to account for the largest share of the 3D printing plastics market in 2018 and is projected to dominate the market by 2023. Photopolymer that consists of a number of polymers in resin form is largely used in the stereolithography technology (SLA). The polyamide segment is expected to register the highest CAGR during the forecast period.

### **Filament form segment to lead the 3D printing plastics market by 2023**

By form, the filament segment is estimated to account for the largest share of the 3D printing plastics market in 2018 and is projected to dominate the market by 2023. Filament form has high demand in the general as well as commercial applications. The powder segment is the fastest-growing form of the 3D printing plastics market during the forecast period.

### **Prototyping application to lead the 3D printing plastics market by 2023**

By application, the prototyping segment is estimated to account for the largest share of the 3D printing plastics market in 2018 and is projected to dominate the market by 2023. Prototyping generates high demand for 3D printing plastics across various end-use industries. Manufacturing is another key application of 3D printing plastics.

### **Healthcare end-use industry to lead the 3D printing plastics market by 2023**

By end-use industry, the healthcare segment is estimated to account for the largest share of the 3D printing plastics market in 2018 and is projected to dominate the market by 2023. The increasing demand for 3D printing plastics in medical devices and equipment, orthopedics, and dental implants is expected to lead to the market growth in the healthcare industry during the forecast period.

### **North America to lead the global 3D printing plastics market during the forecast period**

North America is estimated to account for the largest share of the global 3D printing plastics market by 2023, followed by Europe and Asia Pacific. The US, Germany, China, Japan, and the UK are among the major consumers of 3D printing plastics in these regions, with the increasing adoption of 3D printing technology in various end-use industries. North America and Europe are witnessing increasing investments from major chemical companies to enter the 3D printing plastics market. These companies are developing 3D printing plastic grades suitable for a particular technology in partnership

with printer manufacturers.

## I would like to order

Product name: 3D Printing Plastics Market by Type (Photopolymer, ABS, Polyamide, PLA, PETG), Form, Application (Prototyping, Manufacturing, Tooling), End-Use Industry (Healthcare, Aerospace & Defense, Automotive, Consumer Goods), and Region- Global Forecast to 2028

Product link: <https://marketpublishers.com/r/3EB3241C113EN.html>

Price: US\$ 4,950.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:
