## Abstracts

The 3D stacking market is projected to reach USD 3.1 billion by 2028 from USD 1.2 billion in 2023, at a CAGR of 20.4% from 2023 to 2028. The major opportunities that are expected to drive the market growth of the 3D stacking market include growing adoption of high-bandwidth memory (HBM) devices and integration of advanced electronics within the automotive industry

Increasing demand for high-performance computing and energy-efficient Logics ICs

Logic Integrated Circuits (ICs) are an integral component of digital electronics, facilitating computational operations and decision-making processes within electronic devices. In 3D stacking, Logic ICs play a crucial role in enhancing computational efficiency and reducing footprint. The increasing demand for high-performance computing and energy-efficient devices has fueled the growth of 3D stacking in logic ICs. As consumer expectations for faster and more reliable electronic devices continue to rise, 3D stacking enables a significant increase in computational capabilities within a smaller physical footprint.

Need for enhanced performance and miniaturization in electronic applications to drive market growth for hybrid bonding

The process of hybrid bonding involves several key steps, starting with the preparation and creation of pre-bonding layers. These layers are crucial to ensuring a successful bond. The bonding process itself, characterized by the fusion of semiconductor wafers, is followed by a post-bond annealing step to enhance the bond's strength and reliability. Throughout these processes, rigorous inspection and metrology measures are in place to guarantee the quality and integrity of the bonded structures.

Rising need for advanced and compact packaging solutions in high-performance computing applications to drive market growth for wafer-to-wafer 3D Stacking

Wafer-on-Wafer (WoW) is a 3D integration method that involves bonding and stacking two or more complete wafers, each containing semiconductor devices or chips, to create a vertically integrated structure. This method facilitates the integration of different functionalities from separate wafers, enabling enhanced performance, reduced interconnect lengths, and increased system density.

North America is expected to account for the second largest market share during the forecast period

Being home to some of the leading semiconductor companies, such as Intel Corporation (US), Texas Instruments Inc. (US), Qualcomm Incorporated (US), and Advanced Micro Devices, Inc. (US), makes the region technologically advanced. Semiconductor organizations such as Global Semiconductor Alliance (GSA) (US) and International Microelectronics and Packaging Society (IMAPS) (US) are dedicated associations for the advancement and growth of microelectronics and packaging in North America.

The break-up of profile of primary participants in the 3D stacking market-

> By Company Type: Tier 1 – 38%, Tier 2 – 28%, Tier 3 – 34%

> By Designation Type: C Level – 40%, Director Level – 30% , Others – 30%

> By Region Type: North America – 35%, Europe – 20%, Asia Pacific – 35%, Rest of the World – 10%

The major players of 3D stacking market are Samsung (South Korea), Taiwan Semiconductor Manufacturing Company, Ltd. (Taiwan), Intel Corporation (US), ASE

Technology Holding Co., Ltd. (Taiwan), Amkor Technology (US) among others.

Research Coverage

The report segments the 3D stacking market and forecasts its size based on method, interconnecting technology, device type, end user and region. The report also provides a comprehensive review of drivers, restraints, opportunities, and challenges influencing the market growth. The report also covers qualitative aspects in addition to the quantitative aspects of the market.

Reasons to buy the report:

The report will help the market leaders/new entrants in this market with information on the closest approximate revenues for the overall 3D stacking market and related segments. This report will help stakeholders understand the competitive landscape and gain more insights to strengthen their position in the market and plan suitable go-to-market strategies. The report also helps stakeholders understand the pulse of the market and provides them with information on key market drivers, restraints, opportunities, and challenges.

The report provides insights on the following pointers:

> Analysis of key drivers (Increasing focus on miniaturization and efficient space utilization in electronic devices; Cost advantage offered by 3D stacking technology is increasing its adoption; Growing demand for consumer electronics and gaming devices; Heterogeneous integration and component optimization to improve manufacturing of electronic components; 3D stacking technology to provide shorter interconnect and reduced power consumption boosting its adoption), restraints (High cost of 3D stacking technology to limit adoption; Lack of standardization governing 3D stacking technology), opportunities (Growing adoption of high-bandwidth memory (HBM) devices; Rapid expansion of semiconductor applications across various industries; The integration of advanced electronics within the automotive industry), and challenges (Growing adoption of high-bandwidth memory (HBM) devices; Rapid expansion of semiconductor applications across various industries).

> Product Development/Innovation: Detailed insights on upcoming technologies, research & development activities, and new product launches in the 3D stacking market

Market Development: Comprehensive information about lucrative markets – the report analyses the 3D stacking market across varied regions

Market Diversification: Exhaustive information about new products, untapped geographies, recent developments, and investments in the 3D stacking market

Competitive Assessment: In-depth assessment of market shares, growth strategies and product offerings of leading players like Intel Corporation (US), Samsung (South Korea), Taiwan Semiconductor Manufacturing Company, Ltd. (Taiwan), SK HYNIX INC. (South Korea), Amkor Technology (US) and ASE Technology Holding Co., Ltd. (Taiwan).

**5 MARKET OVERVIEW**

stage interconnection to drive market

  8.3.4 HYBRID TSV

    8.3.4.1 Ability to meet specific design and performance requirements to fuel adoption of hybrid TSV

  8.3.5 DEEP TRENCH TSV

    8.3.5.1 Rising demand for enhanced electrical performance in advanced microprocessors and memory devices to drive market

  8.3.6 MICROBUMP TSV

    8.3.6.1 Rising demand for miniaturized and densely interconnected semiconductor devices to fuel market growth

  8.3.7 THROUGH GLASS VIA (TGV)

    8.3.7.1 Rising adoption of TGV technique in applications requiring transparent and hermetic packaging to drive market

8.4 MONOLITHIC 3D

  8.4.1 ABILITY TO ADDRESS LIMITATIONS OF ADVANCED CMOS SCALING TO FUEL DEMAND FOR MONOLITHIC 3D INTEGRATION

TABLE 33 MONOLITHIC 3D INTEGRATION: 3D STACKING MARKET, BY METHOD, 2019–2022 (USD MILLION)

TABLE 34 MONOLITHIC 3D INTEGRATION: 3D STACKING MARKET, BY METHOD, 2023–2028 (USD MILLION)

**9 3D STACKING MARKET, BY DEVICE TYPE**

9.1 INTRODUCTION

FIGURE 37 MEMS/SENSORS SEGMENT TO REGISTER HIGHEST CAGR IN 3D STACKING MARKET DURING FORECAST PERIOD

TABLE 35 3D STACKING MARKET, BY DEVICE TYPE, 2019–2022 (USD MILLION)

TABLE 36 3D STACKING MARKET, BY DEVICE TYPE, 2023–2028 (USD MILLION)

9.2 LOGIC ICS

  9.2.1 RISING NEED FOR HIGH COMPUTATIONAL EFFICIENCY TO INDUCE DEMAND FOR LOGIC ICS

TABLE 37 LOGIC ICS: 3D STACKING MARKET, BY END USER, 2019–2022 (USD MILLION)

TABLE 38 LOGIC ICS: 3D STACKING MARKET, BY END USER, 2023–2028 (USD MILLION)

9.3 IMAGING & OPTOELECTRONICS

  9.3.1 POTENTIAL TO IMPROVE IMAGE PROCESSING AND OPTICAL FUNCTIONALITIES TO SPUR ADOPTION OF 3D STACKING

TABLE 39 IMAGING & OPTOELECTRONICS: 3D STACKING MARKET, BY END

## 11 3D STACKING MARKET, BY REGION

(USD MILLION)

# 12 COMPETITIVE LANDSCAPE

## I would like to order

Product name: 3D Stacking Market by Method (Die-to-Die, Die-to-Wafer, Wafer-to-Wafer, Chip-to-Chip, Chip-to-Wafer), Technology (Through-Silicon Via, Hybrid Bonding, Monolithic 3D Integration), Device (Logic ICs, Optoelectronics, Memory, MEMS) - Global Forecast to 2028

Product link: https://marketpublishers.com/r/365646C5F2E3EN.html

Price: US$ 4,950.00 (Single User License / Electronic Delivery)
