## **Abstracts**

“Aluminum composite panels market projected to grow at a CAGR of 6.58%”

The aluminum composite panels market size is projected to grow at a CAGR of 6.58% during the forecast period of 2016–2021 and reach USD 1.77 billion by 2021. The market is driven by factors such as rapid urbanization, rising construction activities in emerging economies, and large-scale investments in the industrial and infrastructure sectors.

“Fire-resistant type in aluminum composite panels held the largest market share”

The fire-resistant segment is projected to grow at the highest rate as it is durable, protects from fire and UV-light, and can withstand moist and icy weather conditions. Fire-resistant aluminum composite panels are widely used in residential, industrial, and commercial structures; this segment is projected to grow at the highest CAGR. These are some of the factors driving the global fire-resistant type in the aluminum composite panels market.

“Asia-Pacific region is expected to witness a steady growth during the forecast period”

The Asia-Pacific market is projected to be the fastest-growing market during the forecast period. The increasing population and rising income is accelerating the per capita spending on construction. The markets of China and India are projected to be

lucrative due to their rising middle-class population and rising consumer spending on construction sectors.
