“The automatic bending machine market to exhibit significant growth from 2019 to 2024”

The automatic bending machine market is expected to grow from USD 1.9 billion in 2019 to USD 2.4 billion by 2024, at a CAGR of 4.5%. The growth of this market can be attributed to the high safety and accuracy offered by programmable bending. However, the high maintenance cost, along with the need for qualified operators, hinders the market growth.

“Automatic bending machines capture larger market share than semiautomatic bending machines”

Automatic type bending machines are expected to account for a larger market share than semiautomatic types bending machines from 2019 to 2024. Semi-automatic type bending machines bend the workpiece automatically, but the workpiece has to be fed manually, while automatic type bending machines offer safe automatic loading and unloading of the workpiece, as well as accurate bending. Thus, safe automatic loading and unloading and ease of use drive the market for automatic bending machines.

“Electric bending machines are likely to hold largest market share of the automatic bending machine market”

Electric bending machines are easy to use and offer accuracy in bending tubes/pipes, metal sheets, and bars, as well as consume lower electricity than other types of bending machines such as pneumatic and hydraulic. Also, electric bending machines are cheaper than bending machines based on other technologies, which ultimately boosts the demand for electric bending machines.

“APAC to be fastest-growing market for automatic bending machines during forecast period”

Among all regions, the market in APAC is expected to grow at the highest rate from 2019 to 2024. The growth of the market in this region is attributed to technological innovations. World’s major automakers are focusing on establishing their manufacturing plants in the APAC region, and some of them are even offering tailored electric and hybrid vehicles in this region. Since the economic liberalization in 1991, India has attracted unprecedented attention from major automakers. Shipbuilding has shifted from Europe to APAC. Most of the shipbuilding construction (more than 80%) is concentrated in APAC countries such as Korea, Japan, and China. APAC also has a few of the vital shipbuilding companies that use automatic bending machines.
