Abstracts

The automotive IoT market is projected to grow from USD 131.2 billion in 2023 and is projected to reach USD 322.0 by 2028; it is expected to grow at a CAGR of 19.7% from 2023 to 2028.

Increasing adoption of connected vehicle technology for reducing fuel wastage along with rising adoption of electric and hybrid vehicles to reduce CO2 emissions is expected to fuel the growth of the automotive IoT market. However, lack of infrastructure for proper functioning of connected vehicles is limiting the growth of the automotive IoT market.

“Services segment of the automotive IoT market to witness highest growth during the forecast period.”

By offering, the automotive IoT market has been segmented into hardware, software, and services. The services segment is expected to grow at the highest CAGR during the forecast period. Deployment and integration, consulting, and support & maintenance are the major services contributing to the growth of the automotive IoT market for services. Growth in automotive IoT retrofit market is the major driver for the services market as vehicle owners looking to have a connected car require suitable solutions.

“Market for embedded systems segment is expected to account for largest share during the forecast period”

The market for embedded systems segment is expected to account for largest share of the automotive IoT market during the forecast period. Increase in demand for the best consumer experience is met by upgrade of infotainment systems in vehicles connected to the Internet and with cloud facility. For automotive IoT applications like infotainment, embedded connectivity results in avoidance of incompatibility, interoperability, or tethering issues, resulting in good communication performance. The growth of embedded automotive IoT solutions in the long term can be attributed to various disruptive factors such as government mandates, cost optimization of service plans, and increase in cloud-based services. Moreover, the adoption of 5G technology, which provides high-speed connectivity, will shift the inclination of manufacturers and buyers toward embedded automotive IoT solutions.

“Market for infotainment application is expected to significant share of the automotive IoT market during the forecast period ”

The infotainment application is expected to hold the second-largest market share by 2028. The rising demand for advanced safety features, self-driving vehicles, digital cockpits for driver assistance, and entertainment purposes is driving the growth of the automotive IoT infotainment market. Furthermore, changing consumer preferences toward technologically advanced products is contributing to the growth of the overall market growth. Rapidly growing consumer focus on entertainment while driving, coupled with high demand for car customization backed by high per capita income, is likely to contribute to the growth of infotainment application segment. The introduction of cloud-based services for music and other multimedia support has led to an increase in infotainment applications in vehicles. Users look for multimedia support and smart apps for device integration, high-speed connectivity, intuitive and multi-modal user interfaces in the systems installed in vehicles. Internet radio, music streaming music, and running social networking apps are commonly available services.

“Europe to hold a significant share of the automotive IoT market during the forecast period”

Europe is expected to hold a significantly large share for automotive IoT market during the forecast period. The countries that constitute a major portion of the automotive IoT market in Europe include the Germany, UK, France. Europe is home to many major automobile companies, where the automotive industry is one of the key contributors to the economy. There is a drift from conventional driver assistance systems to advanced connected systems to meet the stringent vehicle safety norms. This is expected to

positively impact the demand for passenger cars with telematics solutions in the future. The market growth in the region can be attributed to mandatory regulations in the EU to use certain telematics services such as eCall (since 2018 in all passenger cars). These advanced technologies help in improving safety and minimizing the risks of collisions and hazardous situations. The market in Europe presents a big opportunity for infotainment and navigation applications. Therefore, the demand for automotive IoT with minimal telematics applications is likely to drive the market in this region. Another key driver for the automotive IoT market in Europe is the eCall mandate, which necessitates all new cars to be fitted with a mandatory sensor that calls emergency services in case of an accident

The report profiles key players in the automotive IoT market with their respective market ranking analysis. Prominent players profiled in this report are include are NXP Semiconductors (Netherlands), Harman (US), Robert Bosch (Germany), Thales (France), TomTom International (Netherlands), IBM (US), Geotab Inc. (Canada), Texas Instruments (US), Intel Corp. (US), Eurotech (Italy), STMicroelectronics (Switzerland), Renesas (Japan), Infineon Technologies (Germany). Apart from this, Airbiquity (US), Qualcomm (US), Visteon (US), Vodafone Group (UK), Microsoft Corporation (US), Alphabet Inc. (US), AT&T (US), Cloudmade (UK), Sierra Wireless (Canada) are among a few emerging companies in the automotive IoT market.

Research Coverage:

This research report categorizes the automotive IoT market on the basis of offering, connectivity form factor, communication type, application, and region. The report describes the major drivers, restraints, challenges, and opportunities pertaining to the automotive IoT market and forecasts the same till 2028. Apart from these, the report also consists of leadership mapping and analysis of all the companies included in the automotive IoT ecosystem.

Key Benefits of Buying the Report

The report will help the market leaders/new entrants in this market with information on the closest approximations of the revenue numbers for the overall automotive IoT market and the subsegments. This report will help stakeholders understand the competitive landscape and gain more insights to position their businesses better and to plan suitable go-to-market strategies. The report also helps stakeholders understand the pulse of the market and provides them with information on key market drivers, restraints, challenges, and opportunities.

The report provides insights on the following pointers:

Analysis of key drivers (Increasing number of regulations mandating advanced features in vehicles for enhanced user comfort, safety, and convenience, Growing use of telematics and user-based insurance programs, Increasing adoption of connected vehicle technology to reduce fuel wastage, Rising adoption of electric and hybrid vehicles to reduce CO2 emissions), restraints (Lack of infrastructure for proper functioning of connected vehicles, Additional cost burden on consumers), opportunities (Emergence of various technologies such as 5G and AI, Ongoing technological developments in autonomous vehicles, Integration of predictive maintenance platform with vehicles), and challenges (Threats associated with cybersecurity) influencing the growth of the automotive IoT market.

Product Development/Innovation: Detailed insights on upcoming technologies, research & development activities, and new product & service launches in the automotive IoT market

Market Development: Comprehensive information about lucrative markets – the report analyses the automotive IoT market across varied regions

Market Diversification: Exhaustive information about new products & services, untapped geographies, recent developments, and investments in the automotive IoT market

Competitive Assessment: In-depth assessment of market shares, growth strategies and service offerings of leading players like NXP Semiconductors (Netherlands), Harman (US), Robert Bosch (Germany), Thales (France), TomTom International (Netherlands), IBM (US), Geotab Inc. (Canada), Texas Instruments (US), among others in the automotive IoT market

6.3.1 PLATFORMS

6.3.1.1 Device management platform

6.3.1.1.1 Manages data transmitted by IoT devices

6.3.1.2 Application management platform

6.3.1.2.1 Helps to manage application operations throughout lifecycle

6.3.1.3 Network management platform

6.3.1.3.1 Provides common platforms to manage networks of vehicles

6.3.2 SOLUTIONS

6.3.2.1 Real-time streaming analytics

6.3.2.1.1 Processing and analysis of fast-moving live data from various sources

6.3.2.2 Security solutions

6.3.2.2.1 Designed to safeguard connected devices, data, and all components of IoT platforms

6.3.2.3 Data management

6.3.2.3.1 Helps detect pre-failure conditions, avoid malfunctions, and reduce cost of car maintenance

6.3.2.4 Remote monitoring systems

6.3.2.4.1 Allow to track, trace, and monitor vehicles in real time

6.3.2.5 Network bandwidth management

6.3.2.5.1 Ensures performance and availability of servers and entire vehicular network

6.4 SERVICES

BILLION)

9.3.1 FLEET & ASSET MANAGEMENT

9.3.1.1 Eliminate paperwork and reduce maintenance costs

9.3.1.2 Use case: Kent Central Ambulance Service adopted fleet management solution offered by TomTom Telematics

9.3.1.3 Use case: Wabco Holdings Inc. (US) acquired AssetTrackr (India) to expand its fleet management solutions business

9.3.2 INTELLIGENT TRAFFIC SYSTEM

9.3.2.1 Integral part of smart cities

9.3.2.2 Use case: Honda Motors uses IoT Telematics solutions from Bright Box

9.3.3 COLLISION AVOIDANCE

9.3.3.1 Alerts drivers about imminent crashes and can assist in braking and stopping vehicles

9.3.3.2 Use case: Driver safety solution developed by Affectiva and TomTom helps in collision avoidance

9.3.4 PARKING MANAGEMENT SYSTEM

9.3.4.1 Allows efficient use of on-street parking spaces or areas

9.3.5 PASSENGER INFORMATION SYSTEM

9.3.5.1 Provides information to public about status of transportation mediums

9.3.5.2 Use case: Tamil Nadu State Transport Corporation uses IoT-based passenger information system for crowd estimation

9.3.6 EMERGENCY VEHICLE NOTIFICATION

9.3.6.1 Designed to alert family members and emergency personnel about accidents

9.3.7 PREDICTIVE MAINTENANCE

9.3.7.1 Predicts ambient conditions, fuel consumption, and other factors critical for ideal performance

9.3.8 REMOTE MONITORING AND DIAGNOSTICS

9.3.8.1 Offer health and diagnosis report for vehicles through wireless networks

TABLE 86 NORTH AMERICA: AUTOMOTIVE IOT MARKET, BY COUNTRY, 2023–2028 (USD BILLION)

10.2.2 US

10.2.2.1 US accounted for largest share of North American automotive IoT market in 2022

10.2.2.2 Use case: Honda Motors incorporated integrated in-vehicle connected services offered by Google for its customers in North America

10.2.3 CANADA

10.2.3.1 Growing popularity of mobile broadband access in vehicles to drive demand for automotive IoT solutions

10.2.3.2 Use case: Public vehicles in Wellington County, Ontario (Canada), integrated with telematics solution from Geotab

10.2.4 MEXICO

10.2.4.1 Presence of established automotive manufacturing base to support market growth

10.2.4.2 Use case: Telefonica Mexico offers unlimited connected car data via General Motors' OnStar platform

TABLE 87 NORTH AMERICA: AUTOMOTIVE IOT MARKET, BY CONNECTIVITY FORM FACTOR, 2019–2022 (USD BILLION)

TABLE 92 EUROPE: AUTOMOTIVE IOT MARKET, BY COUNTRY, 2023–2028 (USD BILLION)

10.3.2 GERMANY

10.3.2.1 Increased R&D and government bill supporting automated driving to support market growth

10.3.2.2 Use case: TomTom Navigation SDK powers PTV Group's (Germany) new truck navigation application

10.3.3 UK

10.3.3.1 Premium and sports car manufacturers to support market growth

10.3.3.2 Use case: Volvo UK incorporated new vehicle tracking device

10.3.4 FRANCE

10.3.4.1 Significant investments in security technologies to drive market

10.3.4.2 Use case: COYOTE, in collaboration with Sigfox Network (France), implemented COYOTE Secure stolen vehicle recovery solution

10.3.5 ITALY

10.3.5.1 Presence of comprehensive intelligent traffic system infrastructure to drive market

10.3.5.2 Use case: DUEL (Italy) leveraged location and navigation services from TomTom to provide real-time traffic information in Italy

10.3.5.3 Use case: LoJack Italia brought enhanced telematics to ALD Automotive Italy

10.3.5.4 OCTO Telematics (Italy) leveraged Ford's connected vehicle data to enhance its telematics services

10.3.6 SPAIN

10.3.6.1 Adoption of AI and cognitive computing to accelerate market growth

10.3.6.2 Use case: Telefónica España collaborated with Spain's Directorate General
for Traffic and SEAT on IoT road safety project

10.3.7 REST OF EUROPE

10.3.7.1 Use case: Bara Posten AB (Sweden) leverages Geotab's fleet telematics
platform to deliver sustainable services

10.4.2.2 Use case: Huawei Technologies (China) leverages navigation applications offered by TomTom

10.4.3 JAPAN

10.4.3.1 Need for real-time traffic information to propel demand for automotive IoT solutions

10.4.3.2 Use case: KDDI in Japan leverages Gemalto's connected cars and IoT solution

10.4.4 SOUTH KOREA

10.4.4.1 Government initiatives to introduce autonomous cars in South Korea to contribute to market growth

10.4.4.2 Use case: Hyundai Motor Group leverages maps and real-time traffic data provided by TomTom

10.4.5 INDIA**10.4.5.1 Demand for high-end navigation systems in India to foster market growth**

10.4.5.2 Use case: MG Motor partnered with Jio India to incorporate Internet of Things (IoT) features in its upcoming mid-size SUV

10.4.6 REST OF ASIA PACIFIC

10.4.6.1 Use case: Toyota Motor Corporation Australia delivered connected vehicles with support from Intellematics

I would like to order

Product name: Automotive IoT Market by Offering (Hardware, Software, Services), by Connectivity Form Factor (Embedded, Tethered, Integrated), by Communication Type, by Application (Navigation, Telematics, Infotainment) and Region - Global Forecast to 2028

Product link: <https://marketpublishers.com/r/A12795FDA25EN.html>

Price: US\$ 4,950.00 (Single User License / Electronic Delivery)

If you want to order Corporate License or Hard Copy, please, contact our Customer Service:

info@marketpublishers.com

Payment

To pay by Credit Card (Visa, MasterCard, American Express, PayPal), please, click button on product page <https://marketpublishers.com/r/A12795FDA25EN.html>
