Abstracts

The global bioactive dressings market is projected to reach USD 5.8 billion by 2029 from USD 3.5 billion in 2024, at a CAGR of 10.5% during the forecast period. The rising incidence of chronic wounds and the increasing elderly population are the major drivers boosting the demand for bioactive dressings. Technology advancements in wound dressings and increased awareness of the benefits like faster healing and patient comfort, are driving market growth, with further expansion anticipated due to ongoing innovation.

“Bioactive dressings segment accounted for the highest market share in the bioactive dressings market, by product type, during the forecast period.”

Based on product type, the bioactive dressings market is divided into bioactive dressings and skin substitutes. In 2023, the bioactive dressings segment led the market. The growth of this segment is primarily driven by the increasing prevalence of chronic, surgical, and traumatic wounds; a rising number of burn injuries; technological advancements in bioactive dressings; and increased spending on the treatment of chronic and surgical wounds

“Chronic wound segment accounted for the highest market share in the bioactive dressings market, by application, during the forecast period.”

Based on application, the bioactive dressings market is divided into acute wounds and chronic wounds. In 2023, the chronic wounds segment held the largest market share. The majority share of this segment is attributed to the increasing elderly population and the rising incidence of chronic wounds, including diabetic foot ulcers, pressure ulcers, arterial ulcers and venous leg ulcers, among others.

“Home Care Settings accounted for the highest CAGR during the forecast period.”

Based on end user, the bioactive dressings market is segmented into hospitals and clinics, long-term care facilities, home care settings, and other end users. In 2023, hospitals and clinics held the largest market share. However, home care settings are projected to grow at the highest CAGR during the forecast period, mainly due to their cost-efficiency compared to hospitals, as well as the convenience and comfort they offer.

“The North America segment accounted for the highest market share in the bioactive dressings market, by region, during the forecast period.”

Bioactive dressings market is divided into North America, Europe, the Asia Pacific (APAC), Latin America (LATAM), the Middle East & Africa (MEA) and GCC Countries. During the forecast period the North America is expected to witness a larger market share. The expansion of the bioactive dressings market in North America is fueled by the high prevalence of chronic wounds, advancements in bioactive dressing technologies, and increased healthcare spending.
