## **Abstracts**

The blood gas analyzers market is expected to reach USD 636.0 million by 2021 from USD 506.9 million in 2016, at a CAGR of 4.6%. Major factors driving the growth of this market include the rising geriatric population and the subsequent growth in prevalence of chronic diseases, and growing demand for point-of-care analyzers. Furthermore, the growth in demand for integrated combined systems and miniaturization of POC blood gas analyzers are expected to support market growth. The global blood gas analyzers market is segmented based on players, major brands, and regions. GEM 3000 (Instrumentation Laboratory) is expected to account for the largest share of the global blood gas analyzers market in 2016, while ePOC (Alere) will be the fastest-growing product segment in the coming years.

Geographically, the blood gas analyzers market is dominated by North America, followed by Europe, APAC, and the Rest of the World (RoW). Growing prevalence of lifestyle diseases, increasing number of product approvals, and rising government initiatives are some of the key factors responsible for the large share of North America in the global market.

Asia-Pacific is estimated to be the fastest-growing regional segment during the forecast period. Japan, China, and India are the major contributors to the Asia-Pacific blood gas analyzers market. Factors such as growing initiatives by market players, increasing

patient population base, and rising number of partnerships and joint ventures are driving the Asia-Pacific market.
