“Rise in applications of smart wireless sensors expected to fuel growth of Bluetooth Smart and Smart Ready market”

The Bluetooth Smart and Smart Ready market, in terms of value, is expected to grow at a CAGR of 2.23% between 2017 and 2023, to reach USD 5.34 billion by 2023 from USD 4.55 billion in 2016. The Bluetooth Smart and Smart Ready market is mainly driven by the following factors: rising demand for Bluetooth Smart and Smart Ready in consumer electronics, and growing application arena across industries such as medical devices, automotive, wearable electronics, and building and retail. However, low data streaming capacity of Bluetooth Smart and Smart Ready is a restraint for the market.

”Bluetooth Smart and Smart Ready market for accessories expected to grow at highest CAGR during forecast period”

Accessories are hardware devices that interact with an app on smartphones or tablets through Bluetooth to perform a specific function. BLE has become the connectivity standard for these devices. Bluetooth Smart and Smart Ready solutions are prominently used in many accessories, such as weight scales, toys, camera triggers, basketballs, and child proximity sensors. Currently, many start-ups are emerging with new apps that can control a specific device. The market of apps is ever increasing and is triggered by

the demand for smartphones and these apps. Thus, the market for accessories is expected to grow at the highest CAGR during the forecast period.

“APAC is the major region in Bluetooth Smart and Smart Ready market”

APAC is expected to hold the largest share of the Bluetooth Smart and Smart Ready market by 2023. It holds a tremendous potential for the market in the coming future owing to the developing economies such as China and India, which have a huge potential for the application of IoT, one of the key growth sectors for the Bluetooth Smart technology. Also, increasing demand for smartphones and PC peripherals, coupled with the realization of huge benefits of improved lifestyle, is driving the BLE market in APAC. Moreover, the APAC region accounts for the largest number of smartphone, tablet, and desktop users in the world, with India being the fastest-growing country.
