## **Abstracts**

The business jets market size is expected to grow from USD 30.1 billion in 2022 to USD 41.8 billion by 2030, at a CAGR of 4.2% during the forecast period. The market for business jets is driven by various factors, such as the increasing demand for improved passenger experience and replacement of old aircraft fleets. The manufacturers of business jets are primarily focused on improving passenger experience and enhancing operational efficiency. However, complex product certification procedure and uncertainty of orders are limiting the overall growth of the market.

The light aircraft type segment is estimated to register the highest CAGR of the business jets market from 2022 to 2030.

Based on aircraft type, the light aircraft segment of the business jets market is estimated to register highest CAGR from 2022 to 2030. High demand for intercity travel is driving the growth of light aircraft type business jets. However, these aircrafts are cost-efficient and comfortable for short-haul distances, that are also adding to the demand and growth of business jets market.

The private user segment of end use is estimated to account for the largest share of the business jets market in 2022.

Based on end use, the private user segment is estimated to account for the largest share of the business jets market in 2022. In recent years, the demand for ease of air

travel has increased significantly. Additionally, they provide access to locations where airlines do not offer regular flights. These are the driving factors that are leading to the increasing number of private users of the business jets market.

North America is estimated to account for the largest share of the business jets market in 2022

North America is estimated to account for the largest share of the business jets market in 2022. The aviation and aerospace sectors in the region are growing steadily. This has consequently created a significant demand for business jets. The growth of the business jets market in this region is driven by factors such as rapid growth in aircraft manufacturing, technological advancements, and travel and tourism.

Break-up of profiles of primary participants in the business jets market

By Company Type: Tier 1 – 55%, Tier 2 – 20%, and Tier 3 – 25%

By Designation: C-Level Executives – 75%, Manager Level – 25%

By Region: North America – 20%, Europe – 25%, Asia Pacific – 30%, Latin America – 10%, Middle East – 10%, Africa – 5%

Key players in the business jets market are Textron Inc. (US), Embraer SA (Brazil), Gulfstream Aerospace (US), Bombardier Inc. (Canada), Dassault Aviation (France), Boeing (US), Airbus (Netherlands), Honda Aircraft Company (US), Syberjet Aircraft (US) and Piper Aircraft (US) among others. These companies provide business jets in various countries across North America, Europe, Asia Pacific, Latin America, Middle East and Africa.

Research Coverage:

The market study covers the business jets market across segments. It aims at estimating the market size and growth potential of this market across various segments, such as aircraft type, end use, point of sale, system, range, and region. The study also includes an in-depth competitive analysis of the key players in the market, along with their company profiles, key observations related to product and business offerings, recent developments, and key market strategies.

### Reasons to buy this report:

The report will help market leaders/new entrants in this market with information on the closest approximations of the revenue numbers for the overall business jets market and its subsegments. This report covers the entire ecosystem of the business jets, and disruptive technologies, such as sophisticated cabin interiors, autonomous business aircraft and electric propulsion. This report will help stakeholders understand the competitive landscape and gain more insights to better position their businesses and plan suitable go-to-market strategies. The report will also help stakeholders understand the pulse of the market and provide them with information on key market drivers, restraints, challenges, and opportunities.

### The report provides insights on the following pointers:

**Market Penetration:** Comprehensive information on business jets offered by top players in the market

**Product Development/Innovation:** Detailed insights on upcoming technologies, research & development activities, and new product launches in the business jets market

**Market Development:** Comprehensive information about lucrative markets – the report analyzes the business jets market across varied regions

**Market Diversification:** Exhaustive information about new products, untapped geographies, recent developments, and investments in the business jets market

**Competitive Assessment:** In-depth assessment of market shares, growth strategies, products, and manufacturing capabilities of leading players in the business jets market

## About

Business jets offer a wide range of advantages to travelers such as on-demand flight schedules, conduct business privately during flights along with guarantee of fast, safe, reliable, and cost effective approach to travelers. Today, business jets have become viable for companies to bring in the offerings of comfortable travel allowing the employees to travel to multiple locations at a short span of time thus, reducing fatigue of most frequent flyers.

The business jet market has grown significantly in the past 20 years, before 2008, due to a rise in corporate demand. Also, with numbers of new aircraft models entering the market that fuelled up the charter and fractional ownership segments increased the customer base for business jets globally.

This report presents a complete analysis of the global business jet market across the forecast period. It portrays the key industry trends that may influence the business jet market. It provides the complete market size of the business jet market over the next six years and provides information on the market size of different business jet types and services for each region.

The report provides information of the leading manufacturers in the business jet market and also provides details of their financial positions, key products, strategies, and developments. It also includes a qualitative analysis of the market by analyzing the pricing and cost analysis of the products. ETOP analysis of the overall market and SWOT analysis of the key market players has been performed in the report.

In this report, the business jet market covers very light jets, small cabin (light) jets, super light jets, mid-size cabin jets, super mid-size cabin jets, large cabin jets, large cabin heavy jets, and bizliners. Also, the report covers the various service programs offered under the business jet market that include charter, fractional ownership, and lease. The large cabin jets segment held the largest market share in the global business jet market, in 2013.

North America holds the largest share of the global business jet market in terms of volume and value. In the forthcoming years, Latin America and Africa are expected to form new revenue-generating pockets for the market players. However, in the Asia-Pacific region, due to economic reasons and regulatory reasons, the business jet market will face much contraction as compared to other regions. Business jet market in

Europe is yet to recover from the effects of the economic downturn.

The global business jet market is marked with intense competition among the top OEMs. These market players continuously innovate, design, and develop new aircraft models across the different types of business jets. The market is dominated by players such as Bombardier Inc. (Canada), Gulfstream Aerospace Corporation (U.S.), Cessna Aircraft Company (U.S.), Dassault Aviation S.A. (France), and Embraer S.A. (Brazil). Few players such as Honda Aircraft Company (Japan) and COMAC (China) are expected to enter this market during the forecast period. In 2013, Gulfstream Aerospace Corporation held the leading position in terms of market size in the business jet market.
