Abstracts

The global cannulas market is segmented by product, material, application, end users, and region. On the basis of products, the global cannulas market is segmented into cardiac cannulas, vascular cannulas, nasal cannulas, arthroscopy cannulas, dermatology cannulas and others (floating spinal cannulas, vitreoretinal cannulas, hysterosalpingography cannulas).

On the basis of material, the market is divided into plastic, silicone, and metal. The silicone material is expected to be fastest growing segment during the forecast period. On the basis of end users, the cannulas market is divided into hospitals, ambulatory surgical centers, and others. Hospitals accounted the largest share of the cannulas market as compared to ambulatory surgical centers, and others (blood banks and home healthcare facilities). This can be attributed to the growing number of patients and increasing healthcare awareness.

From an insight perspective, this research report focuses on the qualitative data, market size, and the growth of various segments and sub segments, competitive landscape, and company profiles. The qualitative data covers various levels of industry analysis such as market dynamics (drivers, restraints, opportunities, and threats), winning imperatives, and burning issues. The report also offers market sizes and related growth of various segments in the industry. It focuses on emerging and high-growth segments

of the cannulas market, high-growth regions, and initiatives of respective governments. The competitive landscape covers growth strategies adopted by industry players in the last three years. The company profiles comprise basic views on the key players in the cannulas market and the product portfolios, developments, and strategies adopted by market players to maintain and increase their market shares in the near future. The abovementioned market research data, current market size, and forecast of the future trends will help key players and new entrants to make the necessary decisions regarding product offerings, geographical focus, change approaches, R&D investments for innovations in products and technologies, and levels of output, in order to remain successful.

5 MARKET OVERVIEW

- 5.1 INTRODUCTION
- 5.2 MARKET DYNAMICS
 - 5.2.1 DRIVERS

5.2.1.1 Increasing number of surgeries among the aging population

5.2.1.2 Increased patient preference for minimally invasive surgeries

5.2.2 RESTRAINTS

5.2.2.1 Uncertain regulatory framework in the medical device industry

5.2.3 OPPORTUNITIES

5.2.3.1 Emerging markets

5.2.3.2 Growing obesity rate

5.2.3.3 Increasing demand for cannulas in home healthcare

5.2.4 CHALLENGES

5.2.4.1 Infections associated with cannula insertions

5.2.5 WINNING IMPERATIVES

5.2.5.1 Growing demand of power-assisted liposuction (PAL) cannulas
