“Increasing demand by the beverages industry to drive the caps & closures market”

The caps & closures market size is estimated to grow from USD 49.78 billion in 2015 to USD 68.71 billion by 2021, at a CAGR of 5.62%. The caps & closures market is driven by factors such as rising demand from end-use industries such as healthcare, food, and beverage as well as rising concerns toward quality and safety of the product.

“Plastic to gain maximum growth during the forecast period”

Plastic as a raw material is projected to be the fastest-growing segment in the next five years. Plastic caps & closures are made from a wide range of polymers such as polyethylene (PE), polypropylene (PP), polyethylene terephthalate (PET), and polyvinyl chloride (PVC). Plastic caps & closures can be easily formed, are of high quality, are cost-effective, and provide excellent barrier properties and the freedom of design; hence, they are preferred for sealing products.

“Asia-Pacific region is set to witness healthy growth during the forecast period”

The Asia-Pacific market is projected to be the fastest-growing market during the forecast period. It is also projected to have the largest market share due to increasing

commercialization and increased demand for packaged goods in the region. The markets of China and India are projected to be lucrative due to their rising middle-class population and rising consumer spending on packaged products.
