## **Abstracts**

“The cast polymers market is projected to reach USD 11.97 billion by 2022, at a CAGR of 5.7% from 2017 to 2022.”

The cast polymers market is projected to grow from USD 9.08 billion in 2017 to USD 11.97 billion by 2022, at a CAGR of 5.7% between 2017 and 2022. A key driving factor for the growth of the cast polymers market across the globe is the increased demand for advanced and qualitative countertops as well other cast polymer products. Moreover, increased demand for cast polymers from the construction sector for constructing new structures and remodeling existing housing and commercial units is also fueling the growth of the cast polymers market across the globe.

“Among types, the engineered stone segment of the cast polymers market is projected to grow at the highest CAGR from 2017 to 2022, in terms of value.”

Based on type, the cast polymers market has been classified into solid surfaces, cultured marble, and engineered stone. The engineered stone type segment of the cast polymers market is estimated to grow at a significant pace during the forecast period. The growth of this segment of the market can be attributed to the increasing demand for engineered stones from shopping malls and departmental stores across the globe. It is commonly used in indoor flooring, walls, and kitchen countertops.

“In terms of value, the Asia Pacific cast polymers market is projected to grow at the

highest CAGR during the forecast period.”

The Asia Pacific cast polymers market is projected to grow at the highest CAGR between 2017 and 2022, in terms of value. The growth of the Asia Pacific cast polymers market can be attributed to the increased use of cast polymers in the construction of new housing units and non-residential buildings in the region. Activities such as business re-structuring, innovations in building materials, and improvement in energy efficiency are indirectly driving the growth of the cast polymers market in the region.
