The cell expansion market is projected to reach USD 26.7 billion by 2029 from an estimated USD 14.3 billion in 2024, at a CAGR of 13.3% during the forecast period of 2024 to 2029. The growth of this market can be attributed to increasing prevalence of chronic diseases. The rising rate of chronic diseases such as cancer is propelling the need of cell based therapies such as cell & gene therapy, tissue engineering, and regenerative medicine. The rising demand for innovative cell based therapies and novel therapeutics is propelling the need of cell expansion. This trend is expected to drive the growth of the cell expansion market in the coming years.

“The biopharmaceutical production segment accounted for the largest share of by application segment in 2023.”

In 2023, the biopharmaceutical production segment accounted for the largest share of by application segment in the global cell expansion market. Biopharmaceutical production include monoclonal antibody production, vaccine production, and other therapeutic protein production. The growing investments and fundings for the development of novel drug products and rising demand for biological therapies such as monoclonal antibodies, vaccines, and therapeutic proteins are promoting the growth of biopharmaceutical production in cell expansion market.

“The US has continued to dominate the cell expansion market during the forecast period of 2024-2029.”

The US dominated the cell expansion market in North America in 2023. The US is the world's largest biopharmaceutical market and a leader in biopharmaceutical research/investments. Additionally, the US is home to some of the world's leading academic research institutes, including Harvard University, Stanford University, and the Massachusetts Institute of Technology (MIT). These institutes conduct cutting-edge research in life sciences, including drug discovery and biotechnology, which involve adoption of cell expansion techniques, resulting to propel the market growth. Additionally, increasing fundings in the field of tissue engineering and regenerative medicine are also driving the growth of cell expansion market.
