“Closed molding composites market projected to register a CAGR of 7.45% during forecast period”

The closed molding composites market is projected to reach USD 66.58 billion by 2021, at a CAGR of 7.45% between 2016 and 2021. The major driver stimulating the closed molding composites market is high demand from the aerospace & defense industry, as they have the ability to reduce weight and increase fuel efficiency. The advantages of closed molding processes over traditional molding processes (open mold process) such as improvement of productivity through innovative engineering approaches, minimization of energy consumption, and reduction of emission levels also drive the market.

“Aerospace & defense is the fastest growing application segment in the closed molding composites market, in terms of value.”

The key drivers of closed molding composites in the aerospace & defense industry are the rise in number of airplane deliveries, high performance properties such as lightweight, excellent safety & acoustic features, and government regulations. Advanced closed molding composites offer higher fatigue tolerance, which helps in improving or increasing the structure of components. To comply with regulatory norms, aerospace

manufacturers such as Boeing (U.S.), Airbus (France), GE Aviation (U.S.), and others have started using these composites to manufacture primary & secondary structures and interior components of aircraft. Thus, aerospace & defense application is likely to be the most profitable investment pocket for stakeholders.

“Asia-Pacific is the fastest-growing market of closed molding composites.”

Asia-Pacific is expected to be the fastest-growing market for closed molding composites in the next five years. The market in this region is driven by increasing consumption of closed molding composite in various industries such as wind energy, construction, electrical & electronics, and transportation. China leads the market in Asia-Pacific. Its consumption has grown remarkably owing to growth in the wind energy, sporting goods, and aerospace & defense industries. The wind energy industry in China witnessed the highest number of wind energy installations in 2015; it added 30.8 GW of new capacity.

This study has been validated through primaries conducted with various industry experts, globally. These primary sources have been divided into following three categories:

By company type- Tier 1- 40%, Tier 2- 33%, and Tier 3- 27%

By designation- C Level- 4%, Director Level- 15%, and Others- 45%

By region- North America- 15%, Europe- 55%, Asia-Pacific- 30%.

The report provides comprehensive analysis of company profiles listed below:

A. Schulman (U.S)

Strongwell Corporation (U.S.)

Royal TenCate N.V. (Netherlands)

Menzolit GmbH (Germany)

GKN Aerospace (U.K.)

Continental Structural Plastics Inc. (U.S.)

Core Molding Technologies (U.S.)

Excel Composites Inc. (Finland)

Polynt S.p.A (Italy)

Target audience

Closed molding composite manufacturers

Raw material suppliers

Distributors & suppliers

Industry associations

Scope of the Report

The research report segments the closed molding composites into the following submarkets:

By Fiber Type:

Glass fiber composites

Carbon fiber composites

Chopped carbon fiber

Continuous carbon Fiber

Other fiber composites

Aramid fiber composites

Natural fiber composites

By Application:

Transportation

Interiors

Exteriors

Aerospace & defense

Interiors

Exteriors

Wind Energy

Electrical & Electronics

Construction

Industrial

Housing

Civil Engineering

Others

Marine

Sporting Goods

By Manufacturing Process:

Vacuum Infusion & Bagging

Compression Molding

Injection Molding

Reaction Injection Molding

Pultrusion

Resin Transfer Molding (RTM)

Light RTM

VARTM

Others

Centrifugal Casting

Continuous Lamination

By Region:

North America

Europe

Asia-Pacific

Middle East & Africa

Latin America

5 MARKET OVERVIEW

5.1 INTRODUCTION

5.2 MARKET SEGMENTATION

5.2.1 CLOSED MOLDING COMPOSITES MARKET, BY FIBER TYPE

5.2.2 CLOSED MOLDING COMPOSITES MARKET, BY MANUFACTURING PROCESS

5.2.3 CLOSED MOLDING COMPOSITES MARKET, BY APPLICATION

5.3 MARKET DYNAMICS

5.3.1 DRIVERS

5.3.1.1 Use of eco-friendly processes for manufacturing composites

5.3.1.2 Increase in use of composites in aerospace & defense industry

5.3.1.3 Reduction in cycle time and labor costs

5.3.2 RESTRAINTS

5.3.2.1 High investment costs

5.3.2.2 High cost of raw materials

5.3.3 OPPORTUNITIES

5.3.3.1 Increase in use of closed molding composites in new applications

5.3.4 CHALLENGES

5.3.4.1 Need for reducing cost of carbon fiber
