Abstracts

“Factors such as awareness about cloud-based ECM benefits among the enterprises and reduced operational and capital expenditure are some of the factors driving the cloud ECM market”

The cloud Enterprise Content Management (ECM) market size is estimated to grow from USD 9.77 billion in 2017 to USD 34.42 billion by 2022, at a Compound Annual Growth Rate (CAGR) of 28.6%. The market is driven by factors such as the need for business agility, faster deployment and scalability, increasing awareness about cloud ECM among enterprises globally, and reduced costs of ownership. However, enterprises face some obstacles while adopting cloud ECM, such as security concerns, data protection, and complexities involved in application portability.

“Workflow management solution is expected to have the fastest growth rate during the forecast period”

There has been increasing demand for tools which support content workflow management, specifically for website data management. Additionally, with the growing usage of Internet, mobile devices, and social media among customers, the demand for enterprise content workflow management has grown exponentially. This solution allows people to control and extend business processes, eliminating the security risks and logistical costs associated with paperbound, manual processes.

“Managed services segment is expected to have the largest market share during the forecast”

Managed services can be defined to be any service managed and delivered by the provider under a contracted Service Level Agreement (SLA) and these providers take complete responsibility of the customers need and deliver service. These services can be considered important as they are directly related to the customer experience and no company can afford to compromise with it in order to remain at the forefront in the competitive arena.

“Asia Pacific (APAC) is projected to grow at the highest CAGR”

North America is expected to hold the largest market share in 2017, while APAC is the fastest growing region, in terms of CAGR. The increased need to manage consistent data and prompt control and visibility mechanisms have led to a wider demand among enterprises for ECM solutions in the APAC region. The adoption of ECM solutions has increased due to the rising need for implementing security and accessibility controls; enhanced decision-making has led APAC to become a highly potential market.

The break-up profiles of primary participants are given below as:

By company: Tier 1 – 18%, Tier 2 – 31%, and Tier 3 – 51%

By designation: C level – 42%, Director level – 33%, and Others – 25%

By region: North America – 47%, Europe – 31%, APAC – 14%, and RoW- 8%
