## **Abstracts**

“Factors such as awareness about cloud-based supply chain management benefits among the enterprises and reduced operational & capital expenditure are driving the cloud Supply Chain Management (SCM) market”

The cloud SCM market size is estimated to grow from 3.26 billion in 2016 to USD 8.07 billion by 2021, at a Compound Annual Growth Rate (CAGR) of 19.8% during the forecast period. The market is driven by factors, such as need for business agility, faster deployment & scalability, increasing awareness about cloud SCM among enterprises globally, and reduced costs of ownership. However, enterprises face some obstacles while adopting cloud SCM, such as security concerns, data protection, and complexities involved in application portability.

“Inventory and warehouse management solution is expected to have the fastest growth rate during the forecast period”

The cloud-based inventory and warehouse management solution manages daily operations in a warehouse and enables centralized management of tasks, such as inventory control, tracking, and location of stock items. The demand for this solution is increasing due to benefits offered, such as faster inventory movement, efficient use of warehouse space, reduced inventory paperwork, improved cycle counting, and reduced

dependency on warehouse personnel.

“Training and consulting service segment is expected to have the largest market share”

On the basis of services, the training and consulting service segment is projected to grow at the highest CAGR during the forecast period. The service enables enterprises to choose the best possible solutions & services, depending on the requirement of the businesses and their users. Furthermore, it helps the enterprises make better and informed business decisions in a technology-centered world.

“Asia-Pacific (APAC) is projected to grow at the highest CAGR”

North America is expected to hold the largest market share in 2016, while APAC is the fastest growing region, in terms of CAGR. Cloud SCM helps avoid resource conflict & IT glitches, and is therefore growing rapidly in APAC. Cloud emergence and mandatory government regulations are simultaneously helping boost the growth of the cloud SCM market in this region.

The break-up profiles of primary participants is given below as:

By company: Tier 1 – 33%, Tier 2 – 41%, and Tier 3 – 26%

By designation: C level – 47%, Director level – 35%, and Others – 18%

By region: North America – 49%, Europe – 29%, APAC – 17%, and RoW- 5%
