## **Abstracts**

“Increasing use of integrated combat systems and growing need for enhancement of performance of combat platforms are the major factors driving the growth of the combat system integration market, globally”

The combat system integration market is projected to grow from USD 4.26 billion in 2016 to USD 25.46 billion by 2022, at a CAGR of 34.7% from 2016 to 2022. The market for combat system integration is driven by several factors, such as rapid development of naval systems in emerging economies and constant upgradation of existing combat systems, globally. The declining defense budgets in developed countries may restrain the growth of the combat system integration market in the U.S., the U.K., France, and Germany.

“The BRICS combat system integration market projected to grow at the highest rate during the forecast period.”

BRICS led the combat system integration market in 2016 and is expected to continue its dominance during the forecast period, 2016 to 2022 as well. The BRICS combat system integration market projected to grow at the highest rate during the forecast period. China is projected to lead the BRICS combat system integration market during the forecast period. The growth of the China combat system integration market can be attributed to increased investments being made in armed forces of the country and rapid advancements taking place in its warfare systems. India is one of the world's largest

defense equipment importers. It is investing increasingly in its navy, with procurement of almost 100 warships planned in the next decade. The integration of combat systems on various platforms and increasing interoperability between systems is crucial for defense forces, worldwide. This need for improved integration of combat systems is fueling the growth of the combat system integration market, globally.
