Abstracts

The Command and control systems market is estimated to be USD 33.0 billion in 2022 and is projected to reach USD 44.9 billion by 2027, at a CAGR of 6.4% from 2022 to 2027. Factors such as rise Modernization of existing military infrastructure, Use of space-based C2 infrastructure for enhanced connectivity and mission support are driving factors assisting the growth of the command and control systems market. The command and control systems market includes major players such as L3harris Technologies (US), Thales Group (France), and General Dynamics Corporation (US) are some of the leading companies in this market, among others. These players have spread their business across various countries includes North America, Europe, Asia Pacific, and Rest of the World. COVID-19 has affected the command and control systems market growth to some extent, and this varies from country to country.

“Land: The fastest-growing and leading segment of the command and control systems market, by platform“ Based on platform, the command and control systems market is segmented into land, maritime, airborne, and space. The increasing need for situational awareness among defense forces of various countries and modernization of existing military infrastructure are expected to drive the demand for command and control systems across platforms. The land segment is projected to lead the command and control systems market from 2022 to 2027 due to the rising demand for joint-force C2 and dismounted soldier C2 systems

“North America: The largest contributing region in the command and control systems

market.” The command and control systems market in the North American region has been studied for the US and Canada. North American countries are awarding a number of contracts to major players of the command and control systems market for the delivery of command and control systems and related components, thus driving the growth of the command and control systems market in the region.

Major companies profiled in the report are L3harris Technologies (US), Thales Group (France), and General Dynamics Corporation (US), among others. (25 Companies)

Research Coverage:

This research report categorizes Command and control systems Market by application, by solution, by platform, by installation type, by installation, and by region, and region for the forecast period from 2022 to 2027 in these segments have been mapped across major regions, namely, North America, Europe, Asia Pacific, and Rest of the World. The scope of the report covers detailed information regarding the major factors, such as drivers, restraints, challenges, and opportunities, influencing the growth of the command and control systems market. A detailed analysis of the key industry players has been done to provide insights into their business overviews; solutions and services; key strategies; new product launches; mergers; and partnerships, agreements, associated with the command and control systems market.

Reasons to buy this report:

The report will help the market leaders/new entrants in this market with information on the closest approximations of the revenue numbers for the overall command and control systems market and the subsegments. This report will help stakeholders understand the competitive landscape and gain more insights to position their businesses better and to plan suitable go-to-market strategies. The report also helps stakeholders understand the pulse of the market and provides them with information on key market drivers, restraints, challenges, and opportunities.

The report provides insights on the following pointers:

Market Penetration: Comprehensive information on command and control systems offered by the top players in the market

Product Development/Innovation: Detailed insights on upcoming technologies, research & development activities, and new product launches in the command

and control systems market

Market Development: Comprehensive information about lucrative markets – the report analyzes the command and control systems market across varied regions

Market Diversification: Exhaustive information about new products, untapped geographies, recent developments, and investments in the command and control systems market

Competitive Assessment: In-depth assessment of market shares, growth strategies, products, and manufacturing capabilities of leading players in the command and control systems market
