## **Abstracts**

The global Construction & demolition waste market is estimated to be USD 26.6 billion in 2021 and is projected to reach USD 34.4 billion by 2026, at a CAGR of 5.3% from 2021 to 2026. The global market is primarily driven by increasing construction activities and inclination of governments toward sustainability in various regions across the globe. Rising demand for sustainable and recycled construction materials for commercial construction projects will further drive the construction & demolition waste market.

“Concrete is expected to be the fastest-growing type in the construction & demolition waste market during the forecast period.”

Others is the fastest-growing type segment in the construction & demolition waste market. The growth of the concrete segment is attributed to the growing use of recycled concrete in construction projects happening across the globe. It accounted for a share of about 31.5% of the construction & demolition waste market, in terms of value, in 2020.

“Residential is expected to be the fastest-growing source in the construction & demolition waste market during the forecast period.”

Residential is the fastest-growing source segment in the construction & demolition

waste market. The market for this segment is driven by rapid urbanization and increasing renovation in the residential sector. It accounted for a share of about 31.3% of the construction & demolition waste market, in terms of value, in 2020.

“APAC is the largest market for construction & demolition waste”

APAC is the largest and market of construction & demolition waste, with China being the major emerging market. The construction & demolition waste market in APAC is driven by the demand from countries such as China, Japan, and India. The market for construction & demolition waste in APAC is expected to increase in the next five years due to many ongoing and upcoming building & construction as well as demolition projects in Asian countries. It accounted for a share of about 60.9% of the construction & demolition waste market, in terms of value, in 2020.

This study has been validated through primaries conducted with various industry experts worldwide. These primary sources have been divided into 3 categories, namely by company, by designation, and by region.

By Company Type- Tier 1- 55%, Tier 2- 30%, and Tier 3- 15%

By Designation- C Level- 21%, Directors – 23%, and Others - 56%

By Region- North America- 45%, Europe- 27%, Asia Pacific- 15%, Middle East – 6%, and South America - 7%

The construction & demolition waste market comprises major solution providers, such as Waste Management (US). SUEZ ( France), Veolia (France), Republic Services (US), and Clean Harbors Inc. (US). The study includes an in-depth competitive analysis of these key players in the construction & demolition waste market, with their company profiles, and key market strategies.

Research Coverage:

The report covers the construction & demolition waste market based on type, source, and region. This study aims at estimating the size and future growth potential of the market across various segmentation types. It also includes an in-depth competitive analysis of the key market players, along with their profiles and key growth strategies.

### Key Benefits of Buying the Report:

Comprehensive coverage and analysis of the construction & demolition waste market in Asia Pacific, Europe, North America, South America and Middle East & Africa

Competitive landscape of major players and their developments in construction & demolition waste market

Identifying high-potential opportunities for construction & demolition waste

Identifying and targeting high-growth application segments

##### 5.3.1 DRIVERS

5.3.1.1 Policies related to construction and demolition waste

5.3.1.2 Sustainable waste management and predicted waste generation

5.3.1.3 Rapid growth of construction industry in emerging economies of APAC, MEA,

and South America

### 5.3.2 RESTRAINTS

5.3.2.1 Weak rules and regulations and illegal dumping of construction & demolition waste

### 5.3.3 OPPORTUNITIES

5.3.3.1 Innovation in sorting and recycling technologies for efficient treatment of construction & demolition waste

5.3.3.2 Growing adoption of construction and demolition waste materials in urban areas

5.3.3.3 Green building system promoting reuse and recycling of concrete elements and aggregates

### 5.3.4 CHALLENGES

5.3.4.1 Problems arising due to construction dust

5.3.4.2 Hindrance in workflow due to inefficiency of municipal bodies and local authorities
