Abstracts

Increasing focus on enhancing customer experience and rapid digitalization are factors that are expected to drive the content recommendation engine market.

The content recommendation engine market is projected to grow from USD 1.16 billion in 2017 to USD 4.95 billion by 2022, at a Compound Annual Growth Rate (CAGR) of 33.7% during the forecast period. Factors, such as increased focus on enhancing customer experience, rapid digitalization, and need for analyzing large volumes of customer data are expected to drive the content recommendation engine market. Protecting sensitive information of customers is a key factor restraining the growth of the market.

Based on component, the solution segment is estimated to lead the content recommendation engine market in 2017.

Based on component, the solution segment is estimated to lead the content recommendation engine market in 2017, as enterprises use it as a targeted marketing tool in their email campaigns and on their websites to enhance the ROI through effective customer engagement. Enterprises are increasingly deploying content recommendation system due to various benefits, such as enhanced customer satisfaction through the personalized online shopping experience.

Based on vertical, the E-commerce segment is estimated to lead the content

recommendation engine market in 2017.

Based on vertical, the E-commerce segment is estimated to lead the content recommendation engine market in 2017. Increasing Internet penetration, the rise in the number of smartphones users, and the explosion of digital data have enabled organizations in E-commerce vertical to adopt content recommendation engine and enhance user experience.

The Asia Pacific content recommendation engine market is expected to grow at the highest CAGR during the forecast period.

The content recommendation engine market has been studied for North America, Europe, Asia Pacific, the Middle East & Africa, and Latin America. The content recommendation engine is being adopted in the Asia Pacific region. Factors such as the rise of Over the Top (OTT) players and rapid digitization are expected to lead to the increasing deployment of content recommendation engine platforms in the Asia Pacific region. The demand for content recommendation engine solution in small and medium enterprises in the Asia Pacific region is high.

In-depth interviews were conducted with Chief Executive Officers (CEOs), marketing directors, innovation and technology directors, and executives from various key organizations operating in the content recommendation engine marketplace.
